

an agency of the U.S. Department of Commerce, has prepared a Record of Decision (ROD) regarding the January 5, 2007, final Programmatic Environmental Impact Statement (PEIS) for the Louisiana Regional Restoration Planning Program (RRP Program). The ROD has been written pursuant to § 102(2)(c) of the National Environmental Policy Act (NEPA) of 1969 (42 U.S.C. 4321 *et seq.*), regulations promulgated by the Council on Environmental Quality (40 CFR part 1505.2), and the NOAA Administrative Order on implementing environmental review procedures (NAO 216-6). The ROD is a concise statement of the management planning and environmental impact analysis process completed, the alternatives considered, and the basis for the selection of preferred alternative. The notice of availability for the final PEIS was published in the **Federal Register** on January 5, 2007, with the close of the mandatory waiting period on February 20, 2007. No comments were received on the final PEIS.

It is the decision of the NOAA, along with the Department of the Interior and the State of Louisiana, to implement the Louisiana RRP Program using the methods evaluated in the PEIS. Because the analysis is programmatic in nature, site and injury-specific features will dictate which restoration alternatives are most appropriate for individual injuries. All practicable means to avoid or minimize environmental harm from the RRP Program alternative selected have been adopted.

SUPPLEMENTARY INFORMATION:

Amendment 13 to the Northeast Multispecies Fishery Management Plan adopted a system to coordinate the management of trans-boundary stocks of cod, haddock, and yellowtail flounder with Canada. As part of that system, each year, the Trans-Boundary Resource Assessment Committee (TRAC)

conducts assessments of Eastern Georges Bank cod and haddock, and Georges Bank yellowtail flounder. These assessments provide the scientific advice used to determine management measures (including Total Allowable Catches, or TACs) for the U.S./Canada fishing area (see 50 CFR 648.85(a)). The TRAC is scheduled for June 12–15, 2007 in St. Andrews, New Brunswick, Canada.

Items for discussion at this meeting:

1. Northeast Fisheries Science Center assessment biologists will brief the public on the catches (landings and discards) and survey data that will be used in the 2007 assessments of Eastern Georges Bank cod and haddock, and Georges Bank yellowtail flounder.

2. Fishermen are encouraged to attend and provide their observations on fishing for cod, haddock, and yellowtail flounder on Georges Bank in calendar year 2006.

Assessment results will not be presented because the assessment will not be completed until the following week.

Discussion will be restricted to those issues specifically identified in this notice.
