k. *Description of Request:* The Alabama Power Company (APC) is requesting a temporary variance of the minimum flow requirement of the Jordan Dam Project license. Because of persistent and worsening drought conditions in the project area and the need to conserve water, APC requests

that it be allowed to begin downramping from 3,000 cubic feet per second (cfs) to 2,000 cfs beginning on or about May 22, 2007, rather than beginning this downramping June 16 as required in the license. Once flows are downramped to 2000 cfs this flow release would be maintained until the following April 1 as required in the license. Included in APC's request were concurrences received from the state and federal resource agencies. The Commission's order issued March 30, 2007, authorized among other things the APC to increase minimum flows from 2,000 cfs to 3,000 cfs rather than to 4,000 cfs beginning April 1, 2007.
