**Title:** NESHAP for Boat Manufacturing.

**ICR Numbers:** EPA ICR Number 1966.03, OMB Control Number 2060-0546.

**ICR Status:** This ICR is scheduled to expire on July 31, 2007. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR Part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

**Abstract:** The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Boat Manufacturing (40

CFR Part 63, Subpart VVVV) were proposed on July 14, 2000, and promulgated on August 22, 2001.

This regulation covers resin and gel coat operations at fiberglass boat manufacturers, paint and coating operations at aluminum boat manufacturers, and carpet and fabric adhesive operations at all boat manufacturers. Owners/operators of boat manufacturing facilities are required to submit initial notification, performance tests, and periodic reports. Respondents are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Semiannual reports are also required. These notifications, reports, and records are essential in determining compliance; and are required, in general, of all sources subject to NESHAP.

Any owner or operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least five years following the date of such measurements, maintain reports and records. All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office. This information is being collected to assure compliance with 40 CFR Part 63, Subpart VVVV as authorized in section 112 and 114(a) of the Clean Air Act. The required information consists of emissions data and other information that have been determined to be private.

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Number for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

**Burden Statement:** The annual public reporting and recordkeeping burden for this collection of information are estimated to average 59 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any

previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

**Respondents/Affected Entities:** Boat manufacturing facilities.

**Estimated Number of Respondents:** 144.

**Frequency of Response:** Initially, quarterly and semiannually.

**Estimated Total Annual Hour Burden:** 26,327.

**Estimated Total Costs:** Include \$0 annualized Capital Startup costs, \$800 annualized Operating and Maintenance Costs (O&M), and \$2,336,986 annualized Labor Costs.

**Changes in the Estimates:** There is an increase of 15,984 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. The adjustment increase in burden from the most recently approved ICR is due to a shift from initial compliance to continuous compliance for the subject sources. There is also an increase of five additional new sources per year over the three years of this ICR. There is also an increase in the labor rates which contributed to an increase in the dollar cost burden.

Dated: May 23, 2007.
