II. What Guidance Does this PR Notice Provide?

This draft PR Notice provides guidance to the registrant concerning antimicrobial products that make labeling claims to "inactivate *Bacillus anthracis* (anthrax) spores" (hereafter referred to as "anthrax-related products"). In summary, this notice specifies that in order for a product to qualify for a claim of inactivating anthrax spores, an anthrax-related product should be:

1. Supported by specific sporidial efficacy studies that are acceptable to EPA; and
2. Subject to specific terms and conditions of registration that limit the use of these products to certain trained persons. Prospective applicants are encouraged to follow the guidance in this notice and consult with EPA prior to applying for registration or amendment of a product when seeking such a claim. This guidance should help the United States be better prepared to respond to the intentional, accidental or natural introduction of anthrax spores by helping to assure that anthrax-related products bear appropriate labeling and are effective when used as directed.

In October 2001, when several letters containing *Bacillus anthracis* (anthrax) spores were introduced into the U.S. Postal Service mail system causing extensive contamination to dozens of buildings, no antimicrobial products were specifically registered for inactivating this particular pathogen. Since that time, the EPA has conducted extensive research and coordinated across the federal government to determine which efficacy test methods would be appropriate for demonstrating the effectiveness of antimicrobial products for inactivating *B. anthracis* spores. Guidance on acceptable efficacy test methods will be made available in a separate document. EPA's Office of Pesticide Programs has also developed guidance on the terms and conditions of registration for the labeling of these products. EPA intends to limit the use of these products to certain groups of trained persons. This notice is aimed primarily at applicants and registrants, but may also be of interest to other federal, state, and local government agencies, academic institutions, and other interested parties.

III. Do PR Notices Contain Binding Requirements?

The PR Notice discussed in this notice is intended to provide guidance to EPA personnel and to pesticide

registrants. While the requirements in the statutes and Agency regulations are binding on EPA and the applicants, this PR Notice is not binding on pesticide registrants, and EPA may depart from the guidance where circumstances warrant and without prior notice. Likewise, pesticide registrants may assert that the guidance is not appropriate generally or not applicable to a specific pesticide or situation.
