### Federal Motor Carrier Safety Administration

[FMCSA Docket No. FMCSA-2006-26601]

#### Qualification of Drivers; Exemption Applications; Diabetes

**AGENCY:** Federal Motor Carrier Safety Administration (FMCSA), DOT.

**ACTION:** Notice of final disposition.

The exemptions will enable these individuals to operate CMVs in interstate commerce.

**DATES:** The exemptions are effective June 8, 2007. The exemptions expire on June 8, 2009.

**FOR FURTHER INFORMATION CONTACT:** Dr. Mary D. Gunnels, Chief, Physical Qualifications Division, (202) 366-4001, [fmcsamedical@dot.gov](mailto:fmcsamedical@dot.gov), FMCSA, Room W64-224, Department of Transportation, 1200 New Jersey Avenue, SE., Washington, DC 20590-0001. #### Background

On March 16, 2007, FMCSA published a notice of receipt of Federal diabetes exemption applications from seventy-four individuals, and requested comments from the public (72 FR 12656). The public comment period closed on April 16, 2007 and two comments were received.

FMCSA has evaluated the eligibility of the seventy-four applicants and determined that granting the exemptions to seventy-two of these individuals would achieve a level of safety equivalent to, or greater than, the level that would be achieved by complying with the current regulation, 49 CFR 391.41(b)(3).

The Agency subsequently determined that two of the applicants did not meet the minimal age criteria outlined in 49 CFR 391.11(b)(1) which states that an individual must be at least 21 years old to operate a CMV in interstate commerce. The two applicants in question, Michael J. Guido and Cameron D. Hubbard will not be granted an exemption at this time. However, they can reapply for the exemption after they have satisfied the criteria discussed above. The Agency announces a correction regarding Robert A. Hartung, a Federal diabetes exemption applicant who was first published in a notice for comments on March 1, 2007 (72 FR 9402). There were no comments to the docket regarding granting him an exemption but he was omitted from the notice of final disposition that was published on April 30, 2007. Therefore, he will be granted an exemption with an effective date of April 30, 2007.

#### Diabetes Mellitus and Driving Experience of the Applicants

The Agency established the current standard for diabetes in 1970 because several risk studies indicated that diabetic drivers had a higher rate of crash involvement than the general population. The diabetes rule provides that "A person is physically qualified to drive a commercial motor vehicle if that person has no established medical history or clinical diagnosis of diabetes

mellitus currently requiring insulin for control" (49 CFR 391.41(b)(3)).

FMCSA established its diabetes exemption program, based on the Agency's July 2000 study entitled "A Report to Congress on the Feasibility of a Program to Qualify Individuals with Insulin-Treated Diabetes Mellitus to Operate in Interstate Commerce as Directed by the Transportation Act for the 21st Century." The report concluded that a safe and practicable protocol to allow some drivers with ITDM to operate CMVs is feasible.

The 2003 notice in conjunction with the November 8, 2005 (70 FR 67777) **Federal Register** Notice provides the current protocol for allowing such drivers to operate CMVs in interstate commerce.

These seventy-three applicants have had ITDM over a range of 1 to 38 years. These applicants report no hypoglycemic reaction that resulted in loss of consciousness or seizure, that required the assistance of another person, or resulted in impaired cognitive function without warning symptoms in the past 5 years (with one year of stability following any such episode). In each case, an endocrinologist has verified that the driver has demonstrated willingness to properly monitor and manage their diabetes, received education related to diabetes management, and is on a stable insulin regimen. These drivers report no other disqualifying conditions, including diabetes-related complications. Each meets the vision standard at 49 CFR 391.41(b)(10).

The qualifications and medical condition of each applicant were stated and discussed in detail in the March 16, 2007, **Federal Register** Notice (72 FR 12656). Therefore, they will not be repeated in this notice.

#### Basis for Exemption Determination

Under 49 U.S.C. 31136(e) and 31315, FMCSA may grant an exemption from the diabetes standard in 49 CFR 391.41(b)(3) if the exemption is likely to achieve an equivalent or greater level of safety than would be achieved without the exemption. The exemption allows the applicants to operate CMVs in interstate commerce.

To evaluate the effect of these exemptions on safety, FMCSA considered medical reports about the applicants' ITDM and vision, and reviewed the treating endocrinologist's medical opinion related to the ability of the driver to safely operate a CMV while using insulin.

Consequently, FMCSA finds that exempting these applicants from the diabetes standard in 49 CFR 391.41(b)(3)
