**SUPPLEMENTARY INFORMATION:**

### I. Abstract

The Federal Food, Drug and Cosmetic Act at 35 U.S.C. 156 permits the United States Patent and Trademark Office (USPTO) to restore the patent term lost due to certain types of regulatory review by the Federal Food and Drug Administration or the Department of Agriculture. Only patents for drug products, medical devices, food additives, and color additives are eligible for extension. The maximum length that a patent may be extended in order to restore the lost portion of the patent term is five years.

The USPTO may in some cases extend the term of an original patent due to certain delays in the prosecution of the patent application, including delays caused by interference proceedings, secrecy orders, or appellate review by the Board of Patent Appeals and Interferences or a Federal court in which the patent is issued pursuant to a decision reversing an adverse determination of patentability. The patent term provisions of 35 U.S.C. 154(b), as amended by Title IV, Subtitle D of the Intellectual Property and Communications Omnibus Reform Act of 1999, require the USPTO to notify the applicant of the patent term adjustment in the notice of allowance and give the applicant an opportunity to request reconsideration of the USPTO's patent term adjustment determination. The USPTO may also reduce the amount of patent term adjustment granted if delays were caused by an applicant's failure to make a reasonable effort to respond within three months of the mailing date of a communication from the USPTO. Applicants may petition for reinstatement of a reduction in patent term adjustment with a showing that, in spite of all due care, the applicant was unable to respond to a communication from the USPTO within the three month period.

The USPTO administers 35 U.S.C. 154 and 156 through 37 CFR 1.701-1.791. These rules permit the public to submit applications to the USPTO to extend the term of a patent past its original expiration date, to request interim extensions and review of final eligibility decisions, and to withdraw an application requesting a patent term extension after it is submitted. Under 35 U.S.C. 156(d), an application for patent term extension must identify the approved product, the patent to be extended, the claims included in the patent for the approved product, and a method of use or manufacturing for the approved product. In addition, the application for patent term extension must provide a brief description of the

activities undertaken by the applicant during the regulatory review period with respect to the approved product and the significant dates of these activities.

The term of a patent which claims a product, a method of using a product, or a method of manufacturing a product shall be extended if the term of the patent has not expired before an application is submitted. The Federal Food, Drug and Cosmetic Act requires that an application for patent term extension be filed with the USPTO within 60 days of the product receiving regulatory approval from the Federal Food and Drug Administration or the Department of Agriculture. Under 35 U.S.C. 156(e), an interim extension may be granted if the term of an eligible patent for which an application for patent term extension has been

submitted would expire before a certificate of extension is issued.

The information in this collection is used by the USPTO to consider whether an applicant is eligible for a patent term extension or reconsideration of a patent term adjustment and, if so, to determine the length of the patent term extension or adjustment. There are no forms associated with this collection.
