

institution's burden under Regulation E due to the receipt requirement will not be impacted if the merchant should choose to accept debit cards for transactions of \$15 or less without printing a receipt. Under the final rule, however, an account-holding financial institution may also choose to program its ATMs to make receipts available only for transactions above \$15. For purposes of this PRA analysis, the Board estimates that if approximately 100 of the 1,289 institutions subject to the Board's supervisory authority program their ATMs in this manner, the resulting total annual burden for this requirement would be 800 hours. This would increase the total annual burden of this information collection from 83,866 hours to 84,666 hours for the first year the financial institution elects to take advantage of the exception. Thereafter, the Board estimates that the burden of making receipts available will decrease as a result of the new exception. Nevertheless, as stated above, the Board anticipates that financial institutions will likely continue to make receipts available for all transactions regardless of the amount and therefore incur no costs in reprogramming their ATMs.

The other federal financial agencies are responsible for estimating and reporting to OMB the total paperwork burden for the institutions for which they have administrative enforcement authority. They may, but are not required to, use the Board's burden estimates. The Board estimates that if 1,500 of the approximately 19,300 depository institutions program their ATMs to take advantage of the exception, the resulting increase in their total estimated annual burden for complying with Regulation E as a whole would be 12,000 hours.

Because the records would be maintained by the institutions and the notices are not provided to the Board, no issue of confidentiality arises under the Freedom of Information Act.

[Docket No. FAA-2007-27439; Airspace Docket No. 07-AAL-04]

#### Revision of Class E Airspace; Red Dog, AK

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** This action revises Class E airspace at Red Dog, AK to provide adequate controlled airspace to contain aircraft executing Instrument Approach Procedures. Two Area Navigation (RNAV) Required Navigation Performance (RNP) Special Instrument Approach Procedures and an RNAV RNP Special Departure Procedure (DP) are being developed for the Red Dog Airport. This action revises existing Class E airspace upward from 1,200 feet (ft.) above the surface at Red Dog Airport, Red Dog, AK.

**DATES:** *Effective Date:* 0901 UTC, August 30, 2007. The Director of the Federal Register approves this incorporation by reference action under title 1, Code of Federal Regulations, part 51, subject to the annual revision of FAA Order 7400.9 and publication of conforming amendments.

#### SUPPLEMENTARY INFORMATION:

#### History

On Monday, April 9, 2007, the FAA proposed to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) to revise Class E airspace upward from 1,200 ft. above the surface at Red Dog, AK (72 FR 17445). The action was proposed in order to create Class E airspace sufficient in size to contain aircraft while executing Special Instrument Approach Procedures for the Red Dog Airport. A recent rulemaking action revealed that a small area of additional controlled airspace is required for these procedures. Additionally, the coordinates listed for the Red Dog Airport and the Selawik VOR/DME have been updated to reflect the most current location surveys. Class E controlled airspace extending upward from 1,200 ft. above the surface, in the

Red Dog Airport area is revised by this action.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. One comment in favor of the action was received. The rule is adopted as proposed.

The area will be depicted on aeronautical charts for pilot reference. The coordinates for this airspace docket are based on North American Datum 83. The Class E airspace areas designated as 700/1,200 ft. transition areas are published in paragraph 6005 of FAA Order 7400.9P, *Airspace Designations and Reporting Points*, dated September 1, 2006, and effective September 15, 2006, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document will be published subsequently in the Order.

#### The Rule

This amendment to 14 CFR part 71 revises Class E airspace at the Red Dog Airport, Alaska. This Class E airspace is revised to accommodate aircraft executing Special Instrument Approach Procedures, and will be depicted on aeronautical charts for pilot reference. The intended effect of this rule is to provide adequate controlled airspace for Instrument Flight Rules operations at the Red Dog Airport, Red Dog, Alaska.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA’s authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle 1, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency’s authority.

This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart 1, Section

40103, Sovereignty and use of airspace. Under that section, the FAA is charged with prescribing regulations to ensure the safe and efficient use of the navigable airspace. This regulation is within the scope of that authority because it creates Class E airspace sufficient in size to contain aircraft executing instrument procedures for the Red Dog Airport and represents the FAA’s continuing effort to safely and efficiently use the navigable airspace.
