SUPPLEMENTARY INFORMATION:

- I. Background on the Virginia Program
- II. Description of the Proposed Amendment
- III. Public Comment Procedures

I. Background on the Virginia Program

Section 503(a) of the Act permits a State to assume primacy for the regulation of surface coal mining and reclamation operations on non-Federal and non-Indian lands within its borders by demonstrating that its program includes, among other things, “* * * a State law which provides for the

regulation of surface coal mining and reclamation operations in accordance with the requirements of the Act * * *; and rules and regulations consistent with regulations issued by the Secretary pursuant to the Act.” See 30 U.S.C. 1253(a)(1) and (7). On the basis of these criteria, the Secretary of the Interior conditionally approved the Virginia program on December 15, 1981. You can find background information on the Virginia program, including the Secretary’s findings, the disposition of comments, and conditions of approval of the Virginia program in the December 15, 1981, **Federal Register** (46 FR 61088). You can also find later actions concerning Virginia’s program and program amendments at 30 CFR 946.12, 946.13, and 946.15.

II. Description of the Proposed Amendment

By letter dated February 13, 2007 (Administrative Record Number VA-1059), the Virginia Department of Mines, Minerals and Energy (DMME) submitted an amendment to the Virginia program. In its letter, the DMME stated that the program amendment reflects revisions of the Virginia Coal Surface Mining Reclamation Regulations concerning the distribution of topsoil and subsoil materials, revegetation standards for success, and to allow approval of natural stream restoration channel design, as developed in consultation with the Army Corps of Engineers.

We announced receipt of the proposed amendment in the April 9, 2007, **Federal Register** (72 FR 17452).

By electronic mail dated April 18, 2007, (Administrative Record Number VA-1074), the DMME stated that it wished to withdraw the changes it previously made to 4 VAC 25-130-816.116(a)(2) and 816.117(a)(2) due to an error. The amendments are to occur at sections 4 VAC 25-130-816.116(b)(3)(v)(C) and 817.116(b)(3)(v)(C) by changing its success standard for areas planted with a mixture of herbaceous and woody species from 90% to 80%.

In its initial amendment to 4 VAC 25-130-816.116/817(b)(3)(v)(C), Virginia deleted its “90%” success standard for areas planted with a mixture of herbaceous and woody species and replaced it with a “70%” success standard for areas planted with a mixture of herbaceous and woody species.

With this new amendment, 4 VAC 25-130-816/817.116(b)(3)(v)(C) provides as follows:

Areas planted with a mixture of herbaceous and woody species shall sustain

a herbaceous vegetative ground cover of 80% and an average of 400 woody plants per acre. At least 40 of the woody plants for each acre shall be wildlife food-producing shrubs located suitably for wildlife enhancement, which may be distributed or clustered on the area.

III. Public Comment Procedures

Under the provisions of 30 CFR 732.17(h), we are seeking your comments on whether the amendment satisfies the applicable program approval criteria of 30 CFR 732.15. If we approve the amendment, it will become part of the Virginia program.
