

After gathering public comments on what additional issues the SEIS should address, the suggested issues will be placed in one of two categories:

1. Issues to be analyzed in the SEIS and
2. Issues beyond the scope of the SEIS.

Rationale for the placement of each issue in category one or two, as well as for the resolution of such issue(s) will be included in the SEIS and/or ROD for the CTA. During the scoping phase, the public is encouraged to help identify questions and concerns to be addressed through the management of the CTA.

An interdisciplinary approach will be used to develop the SEIS in order to consider the variety of resource issues and concerns identified. Disciplines involved in the SEIS process will include specialists with expertise in soils, minerals and geology; hydrology; botany; wildlife; transportation; visual resources; air quality; lands and realty; outdoor recreation; archaeology; paleontology; and sociology and economics, including community development.

Authority: 40 CFR 1501.7.
