

We have made a preliminary determination that approval of the proposed SHA qualifies for a categorical exclusion under NEPA, as provided by the Department of Interior Manual (516 DM 2 Appendix 1 and 516 DM 6 Appendix 1) based on the following criteria: (1) Implementation of the SHA would result in minor or negligible effects on other environmental values or resources; (2) implementation of the SHA would result in minor or negligible effects on other environmental values or resources; and (3) impacts of the SHA, considered together with the impacts of other past, present, and reasonably foreseeable similarly situated projects, would not result, over time, in cumulative effects to environmental values or resources which would be considered significant. This is more fully explained in our environmental action statement.

Based upon this preliminary determination, we do not intend to prepare further NEPA documentation. The Service will consider public comments in making its final determination on whether to prepare such additional documentation.

Decision

We provide this notice pursuant to section 10(c) of the ESA and pursuant to implementing regulations for NEPA (40 CFR 1506.6). We will evaluate the permit application, the proposed SHA, and comments submitted thereon to determine whether the application meets the requirements of section 10(a) of the ESA and NEPA regulations. If the requirements are met, we will sign the proposed SHA and issue an enhancement of survival permit under section 10(a)(1)(A) of the ESA to the Applicant for take of White River springfish, Hiko White River springfish, Pahrnagat roundtail chub and southwestern willow flycatcher incidental to otherwise lawful activities of the project. We will not make a final decision until after the end of the 30-day comment period and will fully consider all comments received during the comment period.
