

Describe current biosecurity practices and producer motivation for implementing or not implementing biosecurity practices.

Determine the prevalence and antimicrobial resistance patterns of potential food-safety pathogens.

This information will help the United States detect trends in the management, production, and health status of the Nation's beef industry over time.

The study will consist of a series of on-farm questionnaires, with biologic sampling, which will be administered by APHIS-designated data collectors. The information collected through the Beef 2007–08 Study will be analyzed and organized into descriptive reports. Information sheets will be derived from these reports, and the data will be disseminated to and used by a variety of constituents, including producers, veterinarians, stakeholders, academia, and others. The data will help APHIS address emerging issues and examine the economic impact of selected health management practices.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 1.645403 hours per response.

Respondents: Beef producers in 24 States.

Estimated annual number of respondents: 4,000.

Estimated annual number of responses per respondent: 1.936.

Estimated annual number of responses: 7,744.

Estimated total annual burden on respondents: 12,742 hours. (Due to

averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 29th day of June 2007.

Kevin Shea,

Acting Administrator, Animal and Plant Health Inspection Service.

[FR Doc. E7–13652 Filed 7–12–07; 8:45 am]

BILLING CODE 3410–34–P

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS–2007–0087]

Notice of Request for Extension of Approval of an Information Collection; Certificate for Poultry and Hatching Eggs for Export

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Extension of approval of an information collection; comment request.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service's intention to request an extension of approval of an information collection associated with the export of poultry and poultry hatching eggs from the United States.

DATES: We will consider all comments that we receive on or before September 11, 2007.

ADDRESSES: You may submit comments by either of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov>, select "Animal and Plant Health Inspection Service" from the agency drop-down menu, then click "Submit." In the Docket ID column, select APHIS–2007–0087 to submit or view public comments and to view supporting and related materials available electronically. Information on using [Regulations.gov](http://www.regulations.gov), including instructions for accessing documents, submitting comments, and viewing the docket after the close of the comment period, is available through the site's "User Tips" link.

- *Postal Mail/Commercial Delivery:* Please send four copies of your comment (an original and three copies) to Docket No. APHIS–2007–0087, Regulatory Analysis and Development,

PPD, APHIS, Station 3A–03.8, 4700 River Road Unit 118, Riverdale, MD 20737–1238. Please state that your comment refers to Docket No. APHIS–2007–0087.

Reading Room: You may read any comments that we receive on this docket in our reading room. The reading room is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue, SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 690–2817 before coming.

Other Information: Additional information about APHIS and its programs is available on the Internet at <http://www.aphis.usda.gov>.

FOR FURTHER INFORMATION CONTACT: For information on an information collection associated with the export of poultry and poultry hatching eggs from the United States, contact Dr. Jack Taniewski, Assistant Director, Technical Trade Services Team, National Center for Import and Export, VS, APHIS, 4700 River Road Unit 39, Riverdale, MD 20737; (301) 734–8364. For copies of more detailed information on the information collection, contact Mrs. Celeste Sickles, APHIS' Information Collection Coordinator, at (301) 734–7477.

SUPPLEMENTARY INFORMATION:

Title: Certificate for Poultry and Hatching Eggs for Export.

OMB Number: 0579–0048.

Type of Request: Extension of approval of an information collection.

Abstract: Under the Animal Health Protection Act (7 U.S.C. 8301 *et seq.*), the Animal and Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture (USDA), among other things, collects information and conducts inspections to ensure that poultry and hatching eggs exported from the United States are free of communicable diseases. The export of agricultural commodities, including poultry and hatching eggs, is a major business in the United States and contributes to a favorable balance of trade. Receiving countries have specific health requirements for poultry and hatching eggs exported from the United States. Most countries require a certification that our poultry and hatching eggs are free of diseases of concern to the receiving country. This certification generally must carry the USDA seal and be endorsed by an authorized APHIS veterinarian.

Veterinary Services Form 17–6, Certificate for Poultry and Hatching

Eggs for Export, is used to meet these requirements.

We are asking the Office of Management and Budget (OMB) to approve our use of this information collection activity for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.5 hours per response.

Respondents: Owners of poultry and hatching egg operations, exporters of poultry products, and accredited veterinarians.

Estimated annual number of respondents: 300.

Estimated annual number of responses per respondent: 32.

Estimated annual number of responses: 9,600.

Estimated total annual burden on respondents: 4,800 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 6th day of July 2007.

Kevin Shea,

Acting Administrator, Animal and Plant Health Inspection Service.

Other Information: Additional information about APHIS and its

programs is available on the Internet at <http://www.aphis.usda.gov>.

FOR FURTHER INFORMATION CONTACT: For information regarding an information collection associated with regulations for the Pseudorabies Eradication Program, contact Dr. John Korslund, Senior Staff Veterinarian, Aquaculture, Swine, Equine, and Poultry Programs, NCAHP, VS, APHIS, 4700 River Road Unit 46, Riverdale, MD 20737; (301) 734-6188. For copies of more detailed information on the information collection, contact Mrs. Celeste Sickles, APHIS' Information Collection Coordinator, at (301) 734-7477.

SUPPLEMENTARY INFORMATION:

Title: Pseudorabies.

OMB Number: 0579-0070.

Type of Request: Revision and extension of approval of an information collection.

Abstract: Under the Animal Health Protection Act (7 U.S.C. 8301 *et seq.*), the United States Department of Agriculture (USDA) has authority for, among other things, preventing the interstate spread of pests and diseases of livestock within the United States and for conducting eradication programs. In connection with this mission, the Animal and Plant Health Inspection Service, USDA, regulates the interstate movement of swine in order to carefully control the movement of swine that are infected with or exposed to pseudorabies. The most common method of pseudorabies transmission is through the movement of infected swine from one herd to another.

The regulations in 9 CFR part 85 govern the interstate movement of swine and other livestock (cattle, sheep, and goats) in order to help prevent the spread of pseudorabies. Regulating the interstate movement of these animals requires the use of certain information collection activities, including the completion of documents attesting to the health status of the swine being moved, the number of swine being moved in a particular shipment, the shipment's point of origin, and the shipment's destination.

With this information, we are able to carefully monitor the location of infected or exposed animals and prevent them from coming into contact with healthy animals.

These documents also provide useful "traceback" information in the event an infected animal is discovered and an investigation must be launched to determine where the animal originated, as well as the number and location of other animals with which it may have had contact during its interstate movement.
