SUPPLEMENTARY INFORMATION:

Summary of Information Collection

The goal of this survey effort is to understand and compare the public's perceptions of Military health care to that of Health Care in general in the United States. The Military Health Care System's vision statement is—"A world class health system that supports the military mission by fostering, protecting, sustaining and restoring health". Recent developments have tarnished that vision. The media have focused attention on the plight of wounded military personnel in the direct care environment, Walter Reed specifically. They have published various articles and stories on the shortfalls of Military Health Care to include support services (Medical Evaluation Boards, Physical Evaluation Boards, Housing, Pay, etc.) as provided in accounts from beneficiary and other sources. There are numerous and ongoing anecdotal accounts of red tape, bureaucracy, physician shortages (particularly mental health care workers), substandard care, neglect, problems with consults and appointments, and overall perceived deep and systemic failures of the Military Health Care System. HA/TMA is very concerned about the implications of these negative accounts of Military Health Care on the perceptions of the public regarding the provision of health care, ancillary and support services. HA/TMA would like to understand the extent to which the public holds negative perceptions of the

system, what their perceptions were/are about Military Health Care in general and what can be done, if anything, to help regain the public's trust in this important resource since this current breach occurred. We would also like to compare and contrast the public's perceptions of Military Health Care with those of Health Care in the public arena as a way to gain more insight into the issue. Moreover, health care for military personnel and their family members has often been cited as one of the key recruitment and retention tools for the Department. Data from this survey will help establish a baseline for understanding the public's attitude about Military Health Care and help determine if changes in the system based on recommended interventions such as increased staffing, computerized medical records, streamlined processes and procedures, etc., will improve the public's perceptions or attitudes. For the purposes of this survey, Military Health Care is defined as medical and dental care for individuals entitled to health care under 10 USC, Chapter 55.
