SUPPLEMENTARY INFORMATION: *Title:* Form MMS-144, Rig Movement Notification Report.

OMB Control Number: 1010-0150.

Abstract: The Outer Continental Shelf (OCS) Lands Act, as amended (43 U.S.C. 1331 *et seq.* and 43 U.S.C. 1801 *et seq.*), authorizes the Secretary of the Interior (Secretary) to prescribe rules and regulations to administer leasing of the OCS. Such rules and regulations will apply to all operations conducted under a lease. Operations on the OCS must preserve, protect, and develop oil and natural gas resources in a manner that is consistent with the need to make such resources available to meet the Nation's energy needs as rapidly as possible; to balance orderly energy resource development with protection of human, marine, and coastal environments; to ensure the public a fair and equitable return on the resources of the OCS; and to preserve and maintain free enterprise competition. Section 1332(6) of the Act requires that "operations in the [O]uter Continental Shelf should be conducted in a safe manner by well-trained personnel using technology, precautions, and techniques sufficient to prevent or minimize the likelihood of blowouts, loss of well control, fires, spillages, physical obstruction to other users of the waters or subsoil and seabed, or other occurrences which may cause damage to the environment or to property, or endanger life or health."

This ICR concerns the regulations in 30 CFR 250 Subparts D, E, and F, specifically §§ 403(c), 502, and 602, on the movement of drilling, completion, and workover rigs and related equipment on and off an offshore platform or from well to well on the same offshore platform. The requirement for operators to notify MMS of rig movements is only specifically stated in § 250.403(c). Since MMS is mandated to perform timely inspections on rigs and platforms, we must have accurate information with regard to their location on the OCS. We use this information in scheduling inspections with regard to priority and cost effectiveness.

However, because of the increased volume of activity in the Gulf of Mexico Region (GOMR), it is now standard MMS procedure to require this notification as a condition of approval for well workover, recompletion, or abandonment operations. Because of this we have included the rig movement notification with the other general information collection requirements of these regulations under OMB Control Numbers 1010-0141, 1010-0067, and 1010-0043 (30 CFR 250, Subparts D, E, and F, respectively).
