SUPPLEMENTARY INFORMATION:

Background

This notice is simply an announcement of a finding that EPA has already made. EPA Region 4 sent a letter to KDAQ on June 18, 2007, stating that the MVEBs in Kentucky's SIP, submitted on September 29, 2006, are adequate. The bi-state Louisville 8-hour ozone nonattainment area is comprised of the following five counties: Bullitt, Oldham and Jefferson counties in Kentucky and Clark and Floyd counties in Indiana. EPA's adequacy comment period for Kentucky's SIP ran from April 27, 2007, through May 29, 2007. During EPA's adequacy comment period no comments regarding the adequacy of the MVEBs were received. This finding has also been announced on EPA's conformity Web site: <http://www.epa.gov/otaq/stateresources/transconf/paststips.htm>. The adequate MVEBs are provided in the following table:

BI-STATE LOUISVILLE 8-HOUR OZONE MVEBS

[Tons per day]

	2003	2020
VOC	40.97	22.92
NO _x	95.51	29.46

EPA has already approved these MVEBs in a separate rulemaking (72 FR 36601, July 5, 2007), and is providing this notice for informational purposes.

Transportation conformity is required by section 176 (c) of the Clean Air Act, as amended in 1990. EPA's conformity rule requires that transportation plans, programs and projects conform to state air quality implementation plans and establishes the criteria and procedures for determining whether or not they do. Conformity to a SIP means that transportation activities will not produce new air quality violations, worsen existing violations, or delay timely attainment of the national ambient air quality standards.

The criteria by which EPA determines whether a SIP's MVEBs are adequate for transportation conformity purposes are

outlined in 40 Code of Federal Regulations 93.118(e)(4). We have described the process for determining the adequacy of submitted SIP budgets in our July 1, 2004, final rulemaking entitled, "Transportation Conformity Rule Amendments for the New 8-hour Ozone and PM_{2.5} National Ambient Air Quality Standards and Miscellaneous Revisions for Existing Areas; Transportation Conformity Rule Amendments: Response to Court Decision and Additional Rule Changes" (69 FR 40004). Please note that an adequacy review is separate from EPA's completeness review, and it also should not be used to prejudge EPA's ultimate approval of the SIP. Even if EPA finds the MVEBs adequate, the Agency may later determine that the SIP itself is not approvable.

Authority: 42 U.S.C. 7401 et seq.
