

NUCLEAR REGULATORY COMMISSION**Agency Information Collection Activities: Proposed Collection; Comment Request**

AGENCY: U.S. Nuclear Regulatory Commission (NRC).

ACTION: Notice of pending NRC action to submit an information collection request to the Office of Management and Budget (OMB) and solicitation of public comment.

SUMMARY: The NRC is preparing a submittal to OMB for review of continued approval of information collections under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Information pertaining to the requirement to be submitted:

1. *The title of the information collection:* Comprehensive Decommissioning Program, Including Annual Data Collection, OMB 3150-xxxx.

2. *Current OMB approval number:* OMB No. 3150-xxxx.

3. *How often the collection is required:* Annually (to keep site information current).

4. *Who is required or asked to report:* Agreement States who have signed Section 274(b) Agreements with NRC and are regulating uranium recovery and/or complex sites undergoing decommissioning.

5. *The number of annual respondents:* 34.

6. *The number of hours needed annually to complete the requirement or request:* 677 hours (approximately 20 hours per respondent).

7. *Abstract:* Agreement States will be asked to provide information about uranium recovery and complex sites undergoing decommissioning regulated by the Agreement States on an annual basis. The information request will allow the NRC to compile, in a centralized location, more complete information on the status of decommissioning and decontamination in the United States in order to provide a national perspective on decommissioning. The information will be made available to the public by the NRC in order to ensure openness and promote communication to enhance public confidence in the national decommissioning program. This does not apply to information, such as trade secrets and commercial or financial information provided by the Agreement States as privileged or confidential. Information such as financial assurance and the status of decommissioning

funding would need to be identified by the Agreement State as privileged or confidential, whereupon the NRC would withhold such information from public access and treat it as sensitive or non-sensitive, per the considerations in 10 CFR 2.390 and 9.17. This does not apply to financial assurance or decommissioning funding information that is already available to the public. Although specific details of the funding mechanisms are treated as confidential, beneficial lessons learned regarding the improvement of decommissioning-related funding will be shared with the Agreement States.

Submit, by September 24, 2007, comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?

2. Is the burden estimate accurate?

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?

A copy of the draft supporting statement may be viewed free of charge at the NRC Public Document Room, One White Flint North, 11555 Rockville Pike, Room O-1 F21, Rockville, MD 20852. OMB clearance requests are available at the NRC worldwide Web site: <http://www.nrc.gov/public-involve/doc-comment/omb/index.html>. The document will be available on the NRC home page site for 60 days after the signature date of this notice.

Comments and questions about the information collection requirements may be directed to the NRC Clearance Officer, Margaret A. Janney (T-5 F52), U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, by telephone at 301-415-7245, or by Internet electronic mail to INFOCOLLECTS@NRC.GOV.

Dated at Rockville, Maryland, this 18th day of July, 2007.

For the Nuclear Regulatory Commission.

Margaret A. Janney,
NRC Clearance Officer, Office of Information Services.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 030-08793]

Notice of Environmental Assessment Related to the Issuance of a License Amendment To Terminate Byproduct Material License No. 21-15209-01, NSF International, Ann Arbor, MI

AGENCY: Nuclear Regulatory Commission.

ACTION: Issuance of Environmental Assessment and Finding of No Significant Impact for license amendment.

FOR FURTHER INFORMATION CONTACT:

Peter J. Lee, PhD, CHP, Health Physicist, Decommissioning Branch, Division of Nuclear Materials Safety, Region III, U.S. Nuclear Regulatory Commission, 2443 Warrenville Road, Lisle, Illinois 60532; telephone: (630) 829-9870; fax number: (630) 515-1259; or by e-mail at pjl2@nrc.gov.

SUPPLEMENTARY INFORMATION: The U.S. Nuclear Regulatory Commission (NRC) is considering the issuance of a licensee amendment to terminate NRC Byproduct Materials License No. 21-15209-01, which is held by NSF International (licensee). The amendment would authorize the unrestricted release of the licensee's former facility located at 789 North Dixboro Road, Ann Arbor, Michigan. The NRC has prepared an Environmental Assessment in support of this action in accordance with the requirements of 10 CFR part 51. Based on the Environmental Assessment, the NRC has determined that a Finding of No Significant Impact is appropriate. The amendment to NSF International's license will be issued following the publication of this Environmental Assessment and Finding of No Significant Impact.

I. Environmental Assessment*Identification of Proposed Action*

The proposed action would approve NSF International's request to terminate its license and release the licensee's former facility for unrestricted use in accordance with 10 CFR part 20, subpart E. The proposed action is in accordance with NSF International's request to the U.S. Nuclear Regulatory Commission (NRC) to terminate its NRC Byproduct Material License by letter dated April 30, 2007 (ADAMS Accession No. ML071220400). The licensee is authorized to use byproduct materials, primarily carbon-14, for research and development in waste water technology. On May 1, 2007, NSF International completed removal of licensed
