

Informal/dispersed camping can be included in access areas.

(d) Whether organizational camping areas within the project boundary should be included.

All recreation areas should be reported, not just public recreation.

(e) Underestimation of the reporting burden. Both commenters believe the Commission has underestimated the amount of time it takes to complete the Form 80 (3 hours).

The Commission's estimate of the time to complete the Form 80s is an average of its licensees ranging from large complicated projects with extensive recreation to smaller less developed projects. In an effort to minimize the burden to licensees, we have eliminated some data fields where the information may be readily available from other sources. Data collection can take place in conjunction with other required monitoring or with other activities at the project such as water quality or dissolved oxygen sampling or general maintenance of the facilities.

4. *Necessity of the Collection of Information: Submission of the information is necessary for the Commission to carry out its responsibilities in implementing the statutory provisions of the sections 4(a), 10(a), 301(a), 304 and 309 of the Federal Power Act (FPA). The authority for the Commission to collect this information comes from Section 10(a) of the FPA which requires the Commission to be responsible for ensuring those hydro projects subjects to its jurisdiction are consistent with the comprehensive development of the nation's waterway for recreation and other beneficial public uses.*

In the interest of fulfilling these objectives, the Commission expects licensees subject to its jurisdiction, to recognize the resources that are affected by their activities and to play a role in protecting such resources. The information filed with the Commission is mandatory.

5. *Respondent Description: The respondent universe currently comprises 400 entities (on average) subject to the Commission's jurisdiction.*

6. *Estimated Burden: 1,200 total hours, 400 respondents (average), 1 response per respondent, and 3 hours per response (rounded off and average time).*

7. *Estimated Cost Burden to respondents: 1,200 hours/2080 hours per years × \$122,137 per year = \$70,464. The cost per respondent is equal to \$176 (rounded off).*

Statutory Authority: Statutory provisions of sections 4(a), 10(a), 301(a), 304 and 309 of

the Federal Power Act, 16 U.S.C. 797, 803, 825c and 825h.
