DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

The Department of Commerce (DOC) will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: Bureau of Industry and Security (BIS).

Title: Report of Requests for Restrictive Trade Practice or Boycott, Single or Multiple Transactions.

Agency Form Number: 621P, 6051P,

and 6051P-A (continuation sheet). *OMB Approval Number:* 0694–0012. *Type of Request:* Regular submission. *Burden Hours:* 1,417.

Average Time Per Response: 1 to 1 hour and 30 minutes.

Number of Respondents: 1,291. Needs and Uses: The collected information, from U.S. citizens, is used to accurately monitor requests for participation in foreign boycotts against countries friendly to the U.S.

This information is also used to note trends in such boycott activity and to assist in carrying out the U.S. policy of opposition to such boycotts.

Affected Public: Business or other forprofit organizations.

Respondent's Obligation: Required to obtain or retain benefits.

OMB Desk Officer: David Rostker, (202) 395–3897.

Copies of the above information collection proposal can be obtained by calling or writing Diana Hynek, Departmental Paperwork Clearance Officer, (202) 482–0266, Department of Commerce, Room 6625, 14th and Constitution Avenue, NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to David Rostker, OMB Desk Officer, e-mail address, *David_Rostker@omb.eop.gov*, or fax number, (202) 395–7285.

Dated: August 22, 2007.

Gwellnar Banks,

Management Analyst, Office of the Chief Information Officer.

DEPARTMENT OF COMMERCE

Bureau of the Census

[Docket Number 070725407-7408-01]

American Community Survey Data Products

AGENCY: Bureau of the Census, Department of Commerce. **ACTION:** Notice and request for comments.

SUMMARY: Beginning in 2008, the Bureau of the Census (Census Bureau) will introduce multyear estimates into the American Community Survey (ACS) data products. The Census Bureau is proposing to modify its current line of data products to accommodate the multiyear estimates and is requesting comments from current and potential users of ACS data products to help guide this modification. The ACS data products are currently only available in the form of single-year estimates for years 2005 and 2006.

DATES: Written comments must be submitted on or before September 27, 2007.

ADDRESSES: Direct all written comments to the Director, U.S. Census Bureau, Room 8H001, Mail Stop 0100, Washington, DC 20233–0001.

FOR FURTHER INFORMATION CONTACT: Douglas Hillmer, Assistant Division Chief, Data Products, American Community Survey Office, on (301) 763–2994, by e-mail at *douglas.w.hillmer@census.gov*, or by mail at Room 3K275, Washington, DC 20233–0001.

SUPPLEMENTARY INFORMATION: The ACS is the Nation's largest survey with an annual sample size of approximately 3 million addresses in the United States and Puerto Rico. The ACS is part of the 2010 Decennial Census Program and provides annually updated, detailed demographic, socioeconomic, and housing information for communities across the United States and Puerto Rico.

In 2008, the ACS will publish multiyear estimates in the form of 3-year period estimates for years 2005–2007, in addition to the single-year estimates for 2007. The current line of data products was developed for the initial releases of ACS data that only included single-year estimates. The Census Bureau is most interested in suggestions on how the current data products can be modified to incorporate the multiyear estimates in ways that are most useful for data users. To view the Census Bureau proposal, please visit *http://www.census.gov/acs/* www/Downloads/ proposal_acsdataproducts.pdf.

Census Bureau working groups have sought to improve the ACS data products by taking into account the previous comments and suggestions of data users. On May 14, 2004 (69 FR 26806), the ACS program issued an earlier Federal Register notice and request for comments on the data products. That notice focused on soliciting comments for data products released in 2005. The Census Bureau received 31 responses to the 2004 notice; each response was reviewed in detail. Several suggestions were incorporated into the ACS data products starting in 2005. For additional information on the earlier 2004 notice, please contact the official identified in the FOR FURTHER INFORMATION CONTACT section of this notice.

We have developed a preliminary version of the suite of data products for the multiyear estimates and are now asking for feedback from public data users. In particular, the Census Bureau is looking for feedback about the basic concept of each product and its usefulness to the public. We welcome all comments and suggestions about how the product could be improved to seamlessly incorporate the multiyear estimates into the existing data products. This second solicitation is for the data release scheduled for 2008 and does not relate to earlier data releases.

The following provides a description of each of the types of data products. All of the data products include sampling errors displayed as margins of error.

• Detailed Tables—These tables provide basic distributions of characteristics. They are the most detailed data and are the basis for other ACS products. The detailed tables include tables iterated for nine race and Hispanic origin universes and tables that show imputation (allocation) rates for selected variables.

• Data Profiles—Detailed tables that provide summaries by demographic, social, economic, and housing characteristics.

• Narrative Profiles—Data profile information presented in a userfriendly, text-and-graphic format that put various topics into words for the general user.

• Geographic Ranking Tables (state rankings)—These tables compare indicators for the United States, all states, and the District of Columbia. Ranking tables also can be viewed as charts that show the estimate as a point and the upper and lower bounds of the confidence interval as "wings" or "arms" extending to either side of the
