Virginia Electric & Power Company; Notice of Availability of Environmental Assessment

August 23, 2007.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380 (Order No. 486, 52 FR 47879), the Office of Energy Projects has reviewed the application for a new license for the Cushaw Hydroelectric Project, located on the James River, near the Town of Glasgow, Virginia, and has prepared an Environmental Assessment (EA). In the EA, Commission staff, analyze potential environmental effects of relicensing the project and conclude that issuing a new license for the project, with appropriate environmental measures, would not constitute a major federal action significantly affecting the quality of the human environment.

A copy of the EA is on file with the Commission and is available for public inspection. The EA may also be viewed on the Commission's Web site at <http://www.ferc.gov> using the "eLibrary" link. LNG Development Company, LLC and Oregon Pipeline Company; Notice of Intent To Prepare an Environmental Impact Statement for the Proposed Oregon LNG Terminal and Pipeline Project, Request for Comments on Environmental Issues and Notice of Public Meetings

August 24, 2007.

The Federal Energy Regulatory Commission (FERC or Commission) and the U.S. Department of Homeland Security, U.S. Coast Guard (Coast Guard) are in the process of evaluating the Oregon LNG Terminal and Pipeline Project involving the construction and operation of facilities proposed by LNG Development Company, LLC and Oregon Pipeline Company (collectively referred to as Oregon LNG). The facilities would be located in northern Oregon and consist of a liquefied natural gas (LNG) import terminal in Warrenton, Oregon, and an associated 117-mile-long natural gas pipeline from the LNG import terminal southeastward across Clatsop, Washington, Yamhill, Marion, and Clackamas Counties, Oregon, to an interconnection with the existing Williams Northwest Pipeline system near Molalla, Oregon.

As a part of this evaluation, FERC staff will prepare an environmental impact statement (EIS) that will address the environmental impacts of the project and the Coast Guard will assess the safety and security of the project. As described below, the FERC and the Coast Guard will hold a joint public meeting to allow the public to provide input to these assessments.

The Commission will use the EIS in its decision-making process to determine whether or not to authorize the project. This Notice of Intent (NOI) explains the scoping process we¹ will use to gather information on the project from the public and interested agencies and summarizes the process that the Coast Guard will use. Your input will

¹"We," "us," and "our" refer to the environmental staff of the FERC's Office of Energy Projects.
