BILLING CODE 4140-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Submission for OMB Review; Comment Request

Periodically, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish a summary of information collection requests under OMB review, in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these documents, call the SAMHSA Reports Clearance Officer on (240) 276-1243.

Proposed Project: Cross-Site Assessment of the Residential Treatment for Pregnant and Postpartum Women (PPW), Their Minor Children and Family Program—(OMB No. 0930-0269)—Revision

The Substance Abuse and Mental Health Services Administration (SAMHSA), Center for Substance Abuse Treatment (CSAT), has funded additional Services Grants for Residential Treatment for Pregnant and Postpartum Women (PPW). The primary purpose of the PPW Program is to provide cost-effective, comprehensive residential substance abuse treatment services for women and their minor children that can be sustained over time. Based on six-month data collection experience gained during training on the cross-site process and instrument administration and data collection with the six projects in the 2003 (first) cohort of this Assessment and feedback from project and assessment staff, the following modifications are proposed: (1) To implement modifications to the instruments; (2) to replace the 12-month post-intake data collection wave with a 6-month post-discharge data collection wave to ensure that post-discharge data is collected on all women (as some may still be in residential treatment at 12 months) and because it is important to collect post-discharge outcome data for all women—especially over a uniform interval (i.e., 6 months); (3) to increase the number of sites and participants involved in this Cross-site Assessment; and, (4) to increase the target population to ensure that the PPW program is more family-centered, as required in Congressional budget language for the PPW program for 2006.

Section 508 [290bb-1] of the Public Health Service Act, as amended, mandates the evaluation and dissemination of findings of residential treatment programs for pregnant and postpartum women. This cross-site accountability assessment will assess project activities implemented for these services. The data collection instruments will be used for program and treatment planning and for this cross-site accountability assessment. The following interview instruments will be administered to mothers:

1. Child Data Collection Tool, Part 1 (child's demographic background) and Part 2 (child's medical background) administered within 30 days of the mother's intake or the child's birth for each of the woman's estimated 4 children;
2. Allen Barriers to Treatment Instrument;
