SUPPLEMENTARY INFORMATION

I. Abstract

The Census Bureau plans to request clearance for the forms necessary to conduct the public employment program which consists of an annual collection of information and a quinquennial collection in a census environment in years ending in "2" or "7." During the upcoming two years, Census plans to conduct the 2008 and 2009 Annual Survey of Government Employment.

Under Title 13, Section 161, of the United States Code, the Secretary of Commerce is authorized to conduct the public employment program, which collects and disseminates data by function for full-time and part-time employees, payroll, and number of part-time hours worked. The number and content of the data items collected are the same in the annual and census cycles.

The burden hours requested are based on the expected 2008 annual survey mail out of 18,160 forms.

The state and local government statistics produced, covered national, state, and local aggregates on various functions with comparative detail for individual governments for the pay period that includes March 12. The public employment program provides the only comprehensive count of employees and payrolls in state and local governments. Government employees constitute approximately one-sixth of the entire U.S. workforce and their salaries are a major source of personal income.

The Census Bureau provides this employment data to the Bureau of Economic Analysis for constructing the functional payrolls in the public sector Gross Domestic Product, payroll being the single largest component of current operations. Other government users include the Bureau of Labor Statistics, as a benchmark for its monthly employment programs, and the Department of Housing and Urban Development, to establish payroll guidelines for local public housing authorities.

The public employment program has increasingly been used as the base for reimbursable programs of other Federal agencies such as: (1) The government portion of the Medical Expenditure Panel Survey commissioned by the Agency for Healthcare Research and Quality to provide timely, comprehensive information about health care use and costs in the United States, and (2) The Bureau of Justice Statistics (BJS) survey Criminal Justice Expenditure and Employment Survey
