

provides that the BLM may consider these lands and resource values in planning, and prescribes measures to manage for their wilderness characteristics. These characteristics include the appearance of naturalness, outstanding opportunities for solitude, and outstanding opportunities for primitive and unconfined recreation.

The DRMP/EIS analyzed five alternatives for management of public lands in the Price Field Office, and disclosed the impacts of implementing each alternative. The Price Field Office Supplemental DRMP/EIS will prescribe specific actions to manage for the wilderness characteristics of non-WSA lands with wilderness characteristics in a new alternative to ensure that: (1) Adequate consideration is given to wilderness characteristics; (2) an adequate range of alternatives is considered for these lands; and (3) an adequate analysis is prepared from which to base future land use decisions. Comments, including names and addresses of respondents, will be available for public review at the Price Field Office. Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Copies of the Supplemental DRMP/EIS are available in the Price Field Office and on the Internet at the address provided above.

## INTERNATIONAL BOUNDARY AND WATER COMMISSION, UNITED STATES AND MEXICO

### United States Section; Notice of Availability of a Final Environmental Assessment and Finding of No Significant Impact for Improvements to the Donna-Brownsville Levee System, in the Lower Rio Grande Flood Control Project, Hidalgo and Cameron Counties, TX

**AGENCY:** United States Section, International Boundary and Water Commission, United States and Mexico.

**ACTION:** Notice of Availability of Final Environmental Assessment (EA) and Finding of No Significant Impact (FONSI).

**SUMMARY:** Pursuant to Section 102(2)(c) of the National Environmental Policy Act (NEPA) of 1969, the Council on Environmental Quality Final Regulations (40 CFR parts 1500 through 1508), and the United States Section, International Boundary and Water Commission's (USIBWC) Operational Procedures for Implementing Section 102 of NEPA, published in the **Federal Register** September 2, 1981, (46 FR 44083); the USIBWC hereby gives notice

of availability of the Final EA and FONSI for Improvements to the Donna-Brownsville Levee System, in the Lower Rio Grande Flood Control Project, located in Hidalgo and Cameron Counties, Texas. The Final EA addresses comments and recommendations provided by the U.S. Fish and Wildlife Service (USFWS), Natural Resources Conservation Service, Texas Historical Commission, and Texas Commission on Environmental Quality, during the Draft EA review period ending July 31, 2007.

**FOR FURTHER INFORMATION CONTACT:**

Daniel Borunda, Environmental Protection Specialist, Environmental Management Division, United States Section, International Boundary and Water Commission; 4171 N. Mesa, C-100; El Paso, Texas 79902. Telephone: (915) 832-4767; e-mail:

[danielborunda@ibwc.state.gov](mailto:danielborunda@ibwc.state.gov). Copies of the document have been provided to potentially affected parties, as identified during the Draft EA review process. Single hard copies of the Final EA may be obtained by request at the above address. Electronic copies may also be obtained from the USIBWC Home Page at <http://www.ibwc.state.gov>.

**DATES:** The Final EA and Final FONSI will be available September 14, 2007.

**SUPPLEMENTARY INFORMATION:** The USIBWC is authorized to construct, operate, and maintain any project or works by the United States of America on the Lower Rio Grande Flood Control Project (LRGFCP), as authorized by the Act of the 74th Congress, Sess. I Ch. 561 (H.R. 6453), approved August 19, 1935 (49 Stat. 660), and codified at 22 U.S.C. 277, 277a, 277b, 277c, and Acts amendatory thereof and supplementary thereto. The LRGFCP was constructed to protect urban, suburban, and highly developed irrigated farmland along the Rio Grande delta in the United States and Mexico.

The USIBWC, in cooperation with the USFWS, prepared this Final EA for the proposed action of raising the Donna-Brownsville Levee System located in Hidalgo and Cameron Counties, Texas to improve flood control. This levee system is part of the LRGFCP that extends approximately 180 miles from the Town of Peñitas in south Texas to the Gulf of Mexico. The Donna-Brownsville Levee extends 65 miles along the Rio Grande, downstream from the Donna Pump Station in Hidalgo County to an area east of Brownsville, approximately 28 miles upstream of the Gulf of Mexico, in Cameron County.

The Proposed Action would increase the flood containment capacity of the Donna-Brownsville Levee System by raising elevation of a number of levee

segments to meet a 3-foot freeboard design criterion for flood protection. Height increases up to 2 feet are typically needed to reach the design freeboard value. The increase in levee height will result in an expansion to the levee footprint by lateral extension of the structure. Structural improvements may be required for some levee segments where seepage is a potential problem.

Dated: September 10, 2007.
