SUPPLEMENTARY INFORMATION:

Background: Sections 401 through 404 of the Surface Transportation Assistance Act of 1982 (STAA) (Pub. L. 97–424) established a program of financial assistance to the States to implement programs to enforce: (a) Federal rules, regulations, standards, and orders applicable to commercial motor vehicle safety; and (b) compatible State rules, regulations, standards and orders. This grant-in-aid program is known as the Motor Carrier Safety

Assistance Program (MCSAP). Section 402(c) of the STAA requires that the Secretary of Transportation (Secretary), on the basis of reports submitted by the States and the Secretary’s own inspections, make a continuing evaluation of the manner in which each State is carrying out its approved safety enforcement plan.

The Transportation Equity Act for the 21st Century (TEA–21) further revised the MCSAP to broaden its purpose beyond enforcement activities and programs by requiring participating States to assume greater responsibility for improving motor carrier safety. TEA–21 required States to develop performance-based plans reflecting national priorities and performance goals, revised the MCSAP funding distribution formula, and created a new incentive funding program. As a result, States are given greater flexibility in designing programs to address national and State goals of reducing the number and severity of commercial motor vehicle (CMV) accidents.

The Safe, Accountable, Flexible, and Efficient Transportation Equity Act: A Legacy for Users (SAFETEA–LU) amended 49 U.S.C. 31102(b)(1) to modify and augment the conditions a State must meet to qualify for basic program funds under the MCSAP. The statute requires a State to document in the State Commercial Vehicle Safety Plan (CVSP) its commitment to meet the following additional conditions:

- Deploy technology to enhance the efficiency and effectiveness of CMV safety programs;
- Include, in both the training manual for the licensing examination to drive a non-CMV and the training manual for the licensing examination to drive a CMV, information on best practices for driving safely in the vicinity of noncommercial and commercial motor vehicles;
- Conduct comprehensive and highly visible traffic enforcement and CMV safety inspection programs in high-risk locations and corridors; and
- Except in the case of an imminent or obvious safety hazard, ensure that an inspection of a vehicle transporting passengers for a motor carrier of passengers is conducted at a station, terminal, border crossing, maintenance facility, destination, or other location where a motor carrier may make a planned stop.

Additionally, SAFETEA–LU provided that States may use a portion of MCSAP basic grant funds to conduct documented enforcement of State traffic laws—both laws and regulations designed to promote the safe operation of CMVs and laws and regulations
