Title: Underground Injection Control (UIC) Program (Renewal).

ICR numbers: EPA ICR No. 0370.21, OMB Control No. 2040-0042.

ICR Status: This ICR is scheduled to expire on September 30, 2007. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The Underground Injection Control (UIC) Program under the Safe Drinking Water Act established a Federal and State regulatory system to protect underground sources of drinking water (USDWs) from contamination by injected fluids. Owners/operators of underground injection wells must obtain permits, conduct environmental monitoring, maintain records, and report results to EPA or the State UIC primacy agency. States must report to EPA on permittee compliance and related information. The mandatory information is reported using standardized forms and annual reports, and the regulations are codified at 40 CFR Parts 144 through 148. The data are used by UIC authorities to ensure the protection of USDWs.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 2.35 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any

previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners and operators of injection wells and state UIC Program primacy agencies.

Estimated Number of Respondents: 38,824.

Frequency of Response: yearly, semi-annually, quarterly, and other.

Estimated Total Annual Hour Burden: 1,000,648 hours.

Estimated Total Annual Cost: \$139,632,191, includes \$104,697,829 in annualized capital or O&M costs.

Changes in the Estimates: There is a decrease of 335,409 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This decrease primarily reflects abatement of permitting and closure activities under the 1999 Class V Rule; reduced Class V well inventory activities; and a reduction in the Class II inventory, particularly the number of Class II permit applications that operators will submit during the clearance period.

Dated: September 14, 2007.

Robert Gunter,

Acting Director, Collection Strategies Division.
