SUPPLEMENTARY INFORMATION:

Title: Environmental Monitoring Form.

OMB Number: 0579-0117.

Type of Request: Extension of approval of an information collection.

Abstract: The mission of the Animal and Plant Health Inspection Service (APHIS) of the United States Department of Agriculture is to protect the health and value of American animal and plant resources. In carrying out this mission, APHIS ensures appropriate consideration of the potential environmental effects of its programs.

In accordance with (1) The National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 *et seq.*), (2) regulations of the Council on Environmental Quality for implementing the procedural provisions of NEPA (40 CFR parts 1500-1508), (3) USDA regulations implementing NEPA (7 CFR part 1b), and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372), APHIS engages in environmental monitoring for certain activities that we conduct to control or eradicate certain

pests and diseases. We monitor those activities that have the greatest potential for harm to the human environment to ensure that the mitigation measures developed to avoid that harm are enforced and effective. In many cases, monitoring is required where APHIS programs are conducted close to habitats of endangered and threatened species. This monitoring is developed in coordination with the U.S. Department of the Interior, Fish and Wildlife Service, in compliance with the Endangered Species Act (50 U.S.C. 17.11 and 17.12).

APHIS field personnel and State cooperators jointly use APHIS Form 2060, Environmental Monitoring Form, to collect information concerning the effects of pesticide use in these sensitive areas. The goal of environmental monitoring is to track the potential impact that APHIS activities may have on the environment and to use this knowledge in making any necessary adjustments in future program actions.

We are asking the Office of Management and Budget (OMB) to approve our use of APHIS Form 2060 for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.5 hours per response.

Respondents: Growers, applicators of pesticides, State department of agriculture personnel.

Estimated annual number of respondents: 150.

Estimated annual number of responses per respondent: 20.
Estimated annual number of responses: 3,000.

Estimated total annual burden on respondents: 1,500 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response).

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 19th day of September 2007.

Kevin Shea,

Acting Administrator, Animal and Plant Health Inspection Service.

For copies of more detailed information on the information collection, contact Mrs. Celeste Sickles, APHIS* Information Collection Coordinator, at (301) 734-7477.

SUPPLEMENTARY INFORMATION: *Title:* Importation of Fruits and Vegetables.

OMB Number: 0579-0128.

Type of Request: Extension of approval of an information collection.

Abstract: As authorized by the Plant Protection Act (7 U.S.C. 7701 *et seq.*) (PPA), the Secretary of Agriculture may prohibit or restrict the importation, entry, exportation, or movement in interstate commerce of any plant, plant product, biological control organism, noxious weed, means of conveyance, or other article if the Secretary determines that the prohibition or restriction is necessary to prevent a plant pest or noxious weed from being introduced into or disseminated within the United States. This authority has been delegated to the Animal and Plant Health Inspection Service (APHIS), which administers regulations to implement the PPA.

The regulations in Subpart-Fruits and Vegetables (7 CFR 319.56 through 319.56-47) allow a number of fruits and vegetables to be imported into the United States, under specified conditions, from certain parts of the

world. Importation of papayas from certain regions of Brazil, Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua, and Panama into the continental United States, Alaska, Puerto Rico, and the U.S. Virgin Islands requires the use of certain information collection activities, including phytosanitary certificates, maintaining fruit fly monitoring records, and marking the cartons.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning this information collection activity. These comments will help us:

(1) Evaluate whether the information collection is necessary for the proper performance of our agency's functions, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the information collection, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies, e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.9940 hours per response.

Respondents: Producers of papayas and plant health officials in regions of Brazil, Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua, and Panama.

Estimated annual number of respondents: 50.

Estimated annual number of responses per respondent: 10.08.

Estimated annual number of responses: 500.

Estimated total annual burden on respondents: 501 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.
