## DEPARTMENT OF ENERGY

### Office of Science; Notice of Renewal of the DOE/NSF Nuclear Science Advisory Committee

Pursuant to Section 14(a)(2)(A) of the Federal Advisory Committee Act and in accordance with Title 41 of the Code of Federal Regulations, Section 102-3.65, and following consultation with the Committee Management Secretariat, General Services Administration, notice is hereby given that the DOE/NSF Nuclear Science Advisory Committee has been renewed for a two-year period.

The Committee will provide advice to the Associate Director of the Office of Science for Nuclear Physics (DOE), and the Assistant Director, Directorate for Mathematical and Physical Sciences (NSF), on scientific priorities within the field of basic nuclear science research. The Secretary of Energy has determined that renewal of the Committee is essential to conduct business of the Department of Energy and the National Science Foundation and is in the public interest in connection with the performance duties imposed by law upon the Department of Energy. The Committee will continue to operate in accordance with the provisions of the Federal Advisory Committee Act, the Department of Energy Organization Act (Pub. L. 95-91), and implementing regulations.

**FOR FURTHER INFORMATION CONTACT:** Ms. Rachel Samuel at (202) 586-3279.

Issued in Washington, DC on September 28, 2007.

**Carol Matthews,**

*Acting Committee Management Officer.*

## DEPARTMENT OF ENERGY

### Office of Science; Fusion Energy Sciences Advisory Committee

**AGENCY:** Department of Energy.

**ACTION:** Notice of open meeting.

**SUMMARY:** This notice announces a meeting of the Fusion Energy Sciences Advisory Committee. The Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat.770) requires that public notice of these meetings be announced in the **Federal Register**.

**DATES:** Tuesday, October 23, 2007, 8:30 a.m. to 6:30 p.m. and Wednesday, October 24, 2007, 8:30 a.m. to noon.

**ADDRESSES:** The Gaithersburg Hilton, 620 Perry Parkway, Gaithersburg, Maryland, 20878.

**FOR FURTHER INFORMATION CONTACT:**

Albert L. Opdenaker, Office of Fusion Energy Sciences; U.S. Department of Energy; 1000 Independence Avenue, SW.; Washington, DC 20585-1290; Telephone: 301-903-4927.

**SUPPLEMENTARY INFORMATION:**

*Purpose of the Meeting:* The major purposes of the meeting are for the Fusion Energy Sciences Advisory Committee (FESAC) to complete its responses to the charges on (1) planning (Greenwald Panel), (2) the Fusion Simulation Project (Tang Panel), and (3) the scientific/programmatic review of the National Compact Stellarator Experiment (NCSE) (Hazeltine Panel). During the meeting, FESAC members will also hear a status report on the ITER Major Item of Equipment (MIE) Project, and discuss future approaches to strategic planning and possible future charges to FESAC.

**Tentative Agenda**

*Tuesday, October 23, 2007*

- Office Fusion Energy Sciences Perspective
- Report from the NCSX Science Review Panel/Discussion
- Report from the Panel on Strategic Planning/Discussion
- Report from the Panel on the Fusion Simulation Program/Discussion
- Public Comments

*Wednesday, October 24, 2007*

- Report on U.S. ITER MIE Project
- Recommendations to DOE on NCSX and Long Term Program Opportunities

*Public Participation:* The meeting is open to the public. If you would like to file a written statement with the Committee, you may do so either before or after the meeting. If you would like to make oral statements regarding any of the items on the agenda, you should contact Albert L. Opdenaker at 301-903-8584 (fax) or [albert.opdenaker@science.doe.gov](mailto:albert.opdenaker@science.doe.gov) (e-mail). You must make your request for an oral statement at least 5 business days before the meeting. Reasonable provision will be made to include the scheduled oral statements on the

agenda. The Chairperson of the Committee will conduct the meeting to facilitate the orderly conduct of business. Public comment will follow the 10-minute rule.

*Minutes:* The minutes of the meeting will be available on the U.S. Department of Energy's *Office of Fusion Energy Sciences* Web site (<http://www.science.doe.gov/ofes/>).

Issued at Washington, DC, on September 28, 2007.

**Rachel M. Samuel,**

*Deputy Committee Management Officer.*

BILLING CODE 6450-01-P

## ENVIRONMENTAL PROTECTION AGENCY

[FRL-8476-8]

### Office of Research and Development; Ambient Air Monitoring Reference and Equivalent Methods: Designation of a New Reference Method

**AGENCY:** Environmental Protection Agency.

**ACTION:** Notice of the designation of a new reference method for monitoring ambient air quality.

**SUMMARY:** Notice is hereby given that the Environmental Protection Agency (EPA) has designated, in accordance with 40 CFR part 53, a new reference method for measuring concentrations of carbon monoxide (CO) in the ambient air.

**FOR FURTHER INFORMATION CONTACT:** Elizabeth Hunike, Human Exposure and Atmospheric Sciences Division (MD-D205-03), National Exposure Research Laboratory, U.S. EPA, Research Triangle Park, North Carolina 27711. Phone: (919) 541-3737, e-mail: [Hunike.Elizabeth@epa.gov](mailto:Hunike.Elizabeth@epa.gov).

**SUPPLEMENTARY INFORMATION:** In accordance with regulations at 40 CFR part 53, the EPA evaluates various methods for monitoring the concentrations of those ambient air pollutants for which EPA has established National Ambient Air Quality Standards (NAAQSs) as set forth in 40 CFR part 50. Monitoring methods that are determined to meet specific requirements for adequacy are designated by the EPA as either reference methods or equivalent methods (as applicable), thereby permitting their use under 40 CFR part 58 by States and other agencies for determining attainment of the NAAQSs.

The EPA hereby announces the designation of a new reference method

for measuring concentrations of CO in the ambient air. This designation is made under the provisions of 40 CFR part 53, as amended on December 18, 2006 (71 FR 61271).

The new reference method for CO is an automated method that utilizes the measurement principle based on non-dispersive infra-red adsorption photometry (combined with gas filter correlation) and the calibration procedure specified in Appendix C of 40 CFR part 50. The newly designated reference method is identified as follows:

RFCA-0907-167, "DKK-TOA Corporation Model GFC-311E Ambient CO Analyzer," operated with full-scale fixed measurement ranges of 0-5, 0-10, 0-20 and 0-50 ppm at any environmental temperature in the range of 20 °C to 30 °C.

An application for a reference method determination for the candidate method was received by the EPA on May 16, 2007. The sampler is commercially available from the applicant, DKK-TOA Corporation, 29-10, 1-Chome, Takadanobaba, Shinjuku-ku, Tokyo 169-8648, Japan ([www.toadkk.co.jp](http://www.toadkk.co.jp)).

A test analyzer representative of this method has been tested in accordance with the applicable test procedures specified in 40 CFR part 53 (as amended on December 18, 2006). After reviewing the results of those tests and other information submitted by the applicant in the application, EPA has determined, in accordance with part 53, that this method should be designated as a reference method. The information submitted by the applicant in the application will be kept on file, either at EPA's National Exposure Research Laboratory, Research Triangle Park, North Carolina 27711 or in an approved archive storage facility, and will be available for inspection (with advance notice) to the extent consistent with 40 CFR part 2 (EPA's regulations implementing the Freedom of Information Act).

As a designated reference method, this method is acceptable for use by states and other air monitoring agencies under the requirements of 40 CFR part 58, Ambient Air Quality Surveillance. For such purposes, the method must be used in strict accordance with the operation or instruction manual associated with the method and subject to any specifications and limitations (e.g., configuration or operational settings) specified in the applicable designation method description (see the identifications of the method above).

Use of the method should also be in general accordance with the guidance and recommendations of applicable

sections of the "Quality Assurance Handbook for Air Pollution Measurement Systems, Volume I," EPA/600/R-94/038a and "Quality Assurance Handbook for Air Pollution Measurement Systems, Volume II, Part 1," EPA-454/R-98-004 (available at <http://www.epa.gov/ttn/amtic/qabook.html>). Vendor modifications of a designated reference method used for purposes of part 58 are permitted only with prior approval of the EPA, as provided in part 53. Provisions concerning modification of such methods by users are specified under Section 2.8 (Modifications of Methods by Users) of Appendix C to 40 CFR part 58.

In general, a method designation applies to any sampler or analyzer which is identical to the sampler or analyzer described in the application for designation. In some cases, similar samplers or analyzers manufactured prior to the designation may be upgraded or converted (e.g., by minor modification or by substitution of the approved operation or instruction manual) so as to be identical to the designated method and thus achieve designated status. The manufacturer should be consulted to determine the feasibility of such upgrading or conversion.

Part 53 requires that sellers of designated reference or equivalent method analyzers or samplers comply with certain conditions. These conditions are specified in 40 CFR 53.9 and are summarized below:

(a) A copy of the approved operation or instruction manual must accompany the sampler or analyzer when it is delivered to the ultimate purchaser.

(b) The sampler or analyzer must not generate any unreasonable hazard to operators or to the environment.

(c) The sampler or analyzer must function within the limits of the applicable performance specifications given in 40 CFR parts 50 and 53 for at least one year after delivery when maintained and operated in accordance with the operation or instruction manual.

(d) Any sampler or analyzer offered for sale as part of a reference or equivalent method must bear a label or sticker indicating that it has been designated as part of a reference or equivalent method in accordance with Part 53 and showing its designated method identification number.

(e) If such an analyzer has two or more selectable ranges, the label or sticker must be placed in close proximity to the range selector and indicate which range or ranges have

been included in the reference or equivalent method designation.

(f) An applicant who offers samplers or analyzers for sale as part of a reference or equivalent method is required to maintain a list of ultimate purchasers of such samplers or analyzers and to notify them within 30 days if a reference or equivalent method designation applicable to the method has been canceled or if adjustment of the sampler or analyzer is necessary under 40 CFR 53.11(b) to avoid a cancellation.

(g) An applicant who modifies a sampler or analyzer previously designated as part of a reference or equivalent method is not permitted to sell the sampler or analyzer (as modified) as part of a reference or equivalent method (although it may be sold without such representation), nor to attach a designation label or sticker to the sampler or analyzer (as modified) under the provisions described above, until the applicant has received notice under 40 CFR Part 53.14(c) that the original designation or a new designation applies to the method as modified, or until the applicant has applied for and received notice under 40 CFR 53.8(b) of a new reference or equivalent method determination for the sampler or analyzer as modified.

Aside from occasional breakdowns or malfunctions, consistent or repeated noncompliance with any of these conditions should be reported to: Director, Human Exposure and Atmospheric Sciences Division (MD-E205-01), National Exposure Research Laboratory, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711.

Designation of this new equivalent method is intended to assist the States in establishing and operating their air quality surveillance systems under 40 CFR Part 58. Questions concerning the commercial availability or technical aspects of the method should be directed to the applicant.

**Jewel F. Morris,**

*Acting Director, National Exposure Research Laboratory.*
