[Docket No. 070808450-7540-01]

RIN 0648-AV83

#### Fisheries of the Northeastern United States; Northeast (NE) Multispecies Fishery; Regulatory Amendment to Adopt Fishing Gear Standards for the NE Multispecies Regular B Day-At-Sea (DAS) Program and the Eastern U.S./Canada Haddock Special Access Program (SAP)

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Proposed rule; request for comments.

**SUMMARY:** NMFS proposes to amend the regulations governing minimum performance standards of fishing gear proposed for use in both the NE multispecies Regular B DAS Program and the Eastern U.S./Canada Haddock SAP. Under the current regulations, the only fishing gear allowed for use in the Eastern U.S./Canada Haddock SAP and the only trawl gear allowed for use in the Regular B DAS Program is a properly configured haddock separator trawl. The purpose of this rule is to ultimately provide greater flexibility to fishermen participating in these programs.

**DATES:** Written comments must be received no later than 5 p.m. local time on November 14, 2007.

**ADDRESSES:** You may submit comments, identified by RIN 0648-AV83, by any one of the following methods:

#### Background

Amendment 13 to the NE Multispecies Fishery Management Plan (FMP) differentiated DAS into three categories: Category A DAS; Category B (regular and reserve) DAS; and Category C DAS. Category B DAS (regular and reserve) were intended to allow effort on stocks that could support additional harvest while avoiding stocks of concern. The final rule implementing Framework Adjustment (FW) 40-A (November 19, 2004, 69 FR 67780) created two programs that allow vessels to use their allocation of Category B DAS, i.e., the Eastern U.S./Canada Haddock SAP Program and the Regular B DAS Program.

FW 40-A specified that vessels fishing in the Eastern U.S./Canada Haddock SAP must use gear that has been demonstrated not to catch significant amounts of cod. Upon implementation of FW 40-A, the only gear authorized for participation in this SAP was a haddock separator trawl, as described in 50 CFR 648.85(a)(3)(iii)(A). The FW 42 final rule (October 23, 2006, 71 FR 62156) modified the requirements for approval of other fishing gear for use in the Regular B DAS Program and the Eastern U.S./Canada Haddock SAP, as specified in § 648.85(b)(6)(iv)(j)(2) and (b)(8)(v)(E)(2), respectively. Specifically, this action authorized the Regional Administrator to approve the use of additional fishing gear in the Regular B DAS Program and the Eastern U.S./Canada Haddock SAP, provided the gear met performance standards to be proposed by the Council.

On June 21, 2007, the Council approved a motion to recommend that the Regional Administrator approve the following gear performance standards when considering additional gear for the Eastern U.S./Canada Haddock SAP, or additional trawl gear for the Regular B DAS Program: New gear must demonstrate a statistically significant reduction in catch of each regulated NE multispecies, and other stocks of concern, of at least 50 percent (by weight, on a trip-by-trip basis); or the
