Title: NSPS for Phosphate Rock Plants (Renewal).

ICR Numbers: EPA ICR Number 1078.08, OMB Control Number 2060-0111.

ICR Status: This ICR is scheduled to expire on November 30, 2007. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR

part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The New Source Performance Standards (NSPS) for Phosphate Rock Plants were proposed on September 21, 1979, and promulgated on April 16, 1982. These standards apply to the new facilities at phosphate rock plants with capacities greater than 4 tons per hour: dryers, calciners, grinders, and ground rock handling and storage facilities, except those facilities producing or preparing phosphate rock solely for consumption in elemental phosphorus production. These standards rely on the capture of particulate emissions by a baghouse or wet scrubber. This information is being collected to determine compliance with 40 CFR part 60, subpart NN. In general, all NSPS standards require initial notifications, performance tests, and periodic reports. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance and are required of all sources subject to NSPS.

Any owner or operator subject to the provisions of this part shall maintain a file of these measurements and retain the file for at least two years following the date of such measurements, maintenance reports and records. All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office. This information is being collected to assure compliance with 40 CFR part 60, subpart NN, as authorized in section 112 and 114(a) of the Clean Air Act. The required information consists of emissions data and other information that have been determined to be private.

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Number for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is

estimated to average 55.2 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Phosphate rock plants.

Estimated Number of Respondents: 13.

Frequency of Response: Initially and semiannually.

Estimated Total Annual Hour Burden: 1,602.

Estimated Total Annual Cost: \$226,427, which includes \$12,210 annualized Capital Startup (CSU) costs, \$111,972 annualized Operating and Maintenance (O&M) costs, and \$102,245 annualized Labor costs.

Changes in the Estimates: There is no change in the labor hours in this ICR compared to the previous ICR. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Secondly, the growth rate for the industry is very low, negative or non-existent, so there is not significant change to the overall labor hours.

There is however, a change in the cost estimate. The previous ICR used a total cost figure of \$124,000 for Capital Startup (CSU) costs and Operating and Maintenance (O&M) costs. This ICR uses the exact cost figure of \$124,182, resulting in a small cost increase.

Since there are no changes in the regulatory requirements and there is no significant industry growth, the labor hours in the previous ICR are used in this ICR and there is no change in the labor hours to industry.

Dated: October 11, 2007.

Sara Hisel-McCoy,
Acting Director, Collection Strategies
Division.
