

Under this alternative the NRC would not approve future license applications. This alternative serves as a baseline for comparison of the potential environmental impacts.

Proposed action—The proposed action is the construction, operation, and decommissioning of an ISL uranium mill. Implementation of the proposed action would require the issuance of an NRC license under the provisions of 10 CFR part 40.

Alternatives—The conventional milling process is one alternative. Other alternatives not listed in this notice may be identified through the scoping process.

3.0 Environmental Impact Areas To Be Analyzed

The following resource areas have been tentatively identified for analysis in the GEIS:

- Public and Occupational Health*: addressing the potential public and occupational consequences from construction, routine operation, transportation, and credible accident scenarios (including natural events), and decommissioning;
- Waste Management*: addressing the types of wastes expected to be generated, handled, stored or subject to re-use or disposal;
- Land Use*: addressing land use plans, policies and controls;
- Transportation*: addressing the transportation modes, routes, quantities, and risk estimates;
- Geology and Soils*: addressing the physical geography, topography, geology and soil characteristics;
- Water Resources*: addressing the surface and ground water hydrology, water use and quality, and the potential for degradation;
- Ecology*: addressing wetlands, aquatic, terrestrial, economically and recreationally important species, and threatened and endangered species;
- Air Quality*: addressing meteorological conditions, ambient background, pollutant sources, and the potential for degradation;
- Noise*: addressing ambient noises, sources, and sensitive receptors;
- Historical and Cultural Resources*: addressing historical, archaeological, and traditional cultural resources;
- Visual and Scenic Resources*: Addressing landscape characteristics, man-made features and viewshed;
- Socioeconomics*: Addressing the demography, economic base, labor pool, housing, transportation, utilities, public services/facilities, education, recreation, and cultural resources;

—*Environmental Justice*: Addressing the potential disproportionately high and adverse impacts to minority and low-income populations; and

—*Cumulative Effects*: Addressing the impacts from past, present, and reasonably foreseeable actions at and near the site.

The examples under each resource areas are not intended to be all inclusive, nor is this list an indication that environmental impacts will occur. The list is presented to facilitate comments on the scope of the GEIS. Additions to, or deletions from, this list may occur as a result of the public scoping process.

4.0 Tiering

Tiering refers to the coverage of general matters in broader environmental impact statements with subsequent narrower statements or environmental analyses incorporating by reference the general discussions and concentrating solely on the issues specific to the narrower statement (40 CFR 1508.28). The NRC intends to use the GEIS to address common issues associated with environmental reviews of ISL uranium milling facilities located in the western United States and then develop site-specific environmental assessments or site-specific environmental impact statements which will tier off the common issues identified and evaluated in the GEIS.

5.0 Scoping Comments

Scoping is an early and open process designed to determine the range of actions, alternatives, and potential impacts to be considered in the GEIS, and to identify the significant issues related to the proposed action. Scoping is intended to solicit input from the public and other agencies so that the analysis can be more clearly focused on issues of genuine concern.

Written comments should be mailed to the address listed above in the **ADDRESSES** section. Scoping comments may also be submitted electronically via email to NRCREP@nrc.gov. Please refer to the "Uranium Recovery GEIS" when submitting comments. The NRC staff will prepare a scoping summary report, in which it will summarize public comments. The NRC will make the scoping summary report and project-related materials, along with other relevant information on the GEIS, available at an NRC Web site, <http://www.nrc.gov/materials/fuel-cycle-fac/licensing/geis.html> so that the public can keep abreast of the current schedule and progress on the development of the GEIS.

6.0 The NEPA Process

The GEIS will be prepared according to NEPA and NRC's NEPA implementing regulations contained in 10 CFR part 51.

After the scoping process is complete, the NRC will prepare a draft GEIS. The draft GEIS is scheduled to be published by April 2008. A public comment period on the draft GEIS is planned, and public meetings to receive comments will be held approximately 3 weeks after publication of the draft GEIS.

Availability of the draft GEIS, the dates of the public comment period on the draft GEIS, and information about the public comment meetings will be announced in the **Federal Register**, on NRC's Web page, and in the local news media. The final GEIS is expected to be published in January 2009 and will address, as appropriate, the public comments received on the draft GEIS.

Dated at Rockville, Maryland, this 29th day of October, 2007.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-56713; File No. SR-Amex-2007-74]

Self-Regulatory Organizations; American Stock Exchange LLC; Order Approving Proposed Rule Change, as Modified by Amendment No. 1 Thereto, Relating to the Listing and Trading of Shares of Funds of the Rydex ETF Trust

October 29, 2007.

I. Introduction

On July 13, 2007, the American Stock Exchange LLC ("Amex" or "Exchange") filed with the Securities and Exchange Commission ("Commission") a

proposed rule change pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")¹ and Rule 19b-4 thereunder.² On July 31, 2007, Amex filed Amendment No. 1 to the proposed rule change. The proposed rule change, as amended, was published for comment in the **Federal Register** on August 14, 2007 for a 15-day comment period.³ The Commission received one comment letter regarding the proposal.⁴ This order approves the proposed rule change, as modified by Amendment No. 1.

II. Description of the Proposal

Amex Rules 1000A-AEMI and 1001A-1005A provide standards for the listing of Index Fund Shares, which are securities issued by an open-end management investment company for exchange trading. These securities are registered under the Investment Company Act of 1940, as well as under the Act. Index Fund Shares are defined in Amex Rule 1000A-AEMI(b)(1) generally as securities based on a portfolio of stocks or fixed income securities that seek to provide investment results that correspond generally to the price and yield of a specified foreign or domestic stock index or fixed income securities index. Amex Rule 1000A-AEMI(b)(2) permits the Exchange to list and trade Index Fund Shares that seek to provide investment results that exceed the performance of an underlying securities index by a specified multiple or that seek to provide investment results that correspond to a specified multiple of the inverse or opposite of the index's performance.⁵

The Exchange proposes to list and trade under Amex Rule 1000A-AEMI shares (the "Shares") of forty-five new funds of the Rydex ETF Trust (the "Trust") that are designated as the Rydex Leveraged Funds (the "Leveraged Funds"), Rydex Inverse Funds (the "Inverse Funds"), and Rydex Leveraged Inverse Funds (the "Leveraged Inverse Funds," and together with the Leveraged Funds and Inverse Funds, collectively, the "Funds"). Each of the
