

of this ICR renewal (EPA ICR No. 0318.11) is January 22, 2008—at which point EPA ICR No. 0318.10 will be superseded by EPA ICR No. 0318.11. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

**Abstract:** The Clean Watersheds Needs Survey (CWNS) is required by Sections 205(a) and 516 of the Clean Water Act (<http://www.epa.gov/cwns>). It is a periodic inventory of existing and proposed publicly owned wastewater treatment works (POTWs) and other water pollution control facilities in the United States, as well as an estimate of how many POTWs need to be built. The CWNS is a voluntary, joint effort of EPA and the States. The Survey records cost and technical data associated with POTWs and other water pollution control facilities, existing and proposed, in the United States. The State respondents who provide this information to EPA are State agencies responsible for environmental pollution control. No confidential information is used, nor is sensitive information protected from release under the Public Information Act. EPA achieves national consistency in the final results through the application of uniform guidelines and validation techniques.

**Burden Statement:** The annual public reporting and recordkeeping burden for this collection of information is estimated to average 1.46 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information;

and transmit or otherwise disclose the information.

**Respondents/Affected Entities:** State governments, water pollution control facilities.

**Estimated Number of Respondents:** 56 State (States, District of Columbia, and U.S. Territories) respondents and approximately 4,700 water pollution control facilities.

**Frequency of Response:** Every 4 Years.

**Estimated Total Annual Hour Burden:** 8,807.

**Estimated Total Annual Cost:** \$305,805. This includes an estimated burden cost of \$305,805 and an estimated cost of \$0 for capital investment or maintenance and operational costs.

**Changes in the Estimates:** There is an increase of 1,136 hours in the total estimated burden identified in ICR 0318.09 (the ICR for the CWNS 2004 collection) in the OMB Inventory of Approved ICR Burdens. This increase is due to adjustment in estimates as well as increased ability for respondents to have supporting documentation necessary for responding. These increases were largely offset by burden reductions made through improving the data collection system, reducing data requirements, and streamlining data quality assurance practices.

Written comments on laboratory accreditation issues and/or environmental monitoring issues are encouraged and should be sent to Ms. Lara P. Autry, DFO, U.S. EPA (E243-05), 109 T. W. Alexander Drive, Research Triangle Park, NC 27709, faxed to (919) 541-4261, or e-mailed to [autry.lara@epa.gov](mailto:autry.lara@epa.gov). Members of the public are invited to listen to the teleconference calls, and time permitting, will be allowed to comment on issues discussed during this and previous ELAB meetings. Those persons interested in attending should call Lara P. Autry at (919) 541-5544 to obtain teleconference information. The number of lines for the teleconferences, however, are limited and will be distributed on a first come, first serve basis. Preference will be given to a group wishing to attend over a request from an individual. For information on access or services for individuals with disabilities, please contact Lara P. Autry at the number above. To request accommodation of a disability, please contact Lara P. Autry, preferably at least 10 days prior to the meeting, to give EPA as much time as possible to process your request.

### **Clean Water Act Section 303(d): Availability of List Decisions**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice of availability.

**SUMMARY:** This notice announces the availability of EPA's final action identifying water quality limited segments and associated pollutants in

Louisiana to be listed pursuant to Clean Water Act Section 303(d), and request for public comment. Section 303(d) requires that states submit and EPA approve or disapprove lists of waters for which existing technology-based pollution controls are not stringent enough to attain or maintain state water quality standards and for which total maximum daily loads (TMDLs) must be prepared.

On October 19, 2007, EPA partially approved and partially disapproved Louisiana's 2006 Section 303(d) submittal. Specifically, EPA approved Louisiana's listing of 347 waterbody pollutant combinations, and associated priority rankings. EPA disapproved Louisiana's decisions not to list 136 waterbody pollutant combinations. EPA identified these additional waterbodies and pollutants along with priority rankings for inclusion on the 2006 Section 303(d) List.

EPA is providing the public the opportunity to review its final decisions to add waters and pollutants to Louisiana's 2006 Section 303(d) List, as required by EPA's Public Participation regulations (40 CFR part 25). EPA will consider public comments and if necessary amend its final action on the additional waterbodies and pollutants identified for inclusion on Louisiana's Final 2006 Section 303(d) List.

**DATES:** Comments must be submitted in writing to EPA on or before December 5, 2007.

**ADDRESSES:** Comments on the decisions should be sent to Diane Smith, Environmental Protection Specialist, Water Quality Protection Division, U.S. Environmental Protection Agency Region 6, 1445 Ross Ave., Dallas, TX 75202-2733, telephone (214) 665-2145, facsimile (214) 665-7373, or e-mail: [smith.diane@epa.gov](mailto:smith.diane@epa.gov). Oral comments will not be considered. Copies of the documents which explain the rationale for EPA's decisions and a list of the 136 water quality limited segments for which EPA disapproved Louisiana's decisions not to list can be obtained at EPA Region 6's Web site at <http://www.epa.gov/earth1r6/6wq/tmdl.htm>, or by writing or calling Ms. Smith at the above address. Underlying documents from the administrative record for these decisions are available for public inspection at the above address. Please contact Ms. Smith to schedule an inspection.

**FOR FURTHER INFORMATION CONTACT:** Diane Smith at (214) 665-2145.

**SUPPLEMENTARY INFORMATION:** Section 303(d) of the Clean Water Act (CWA) requires that each state identify those waters for which existing technology-

based pollution controls are not stringent enough to attain or maintain state water quality standards. For those waters, states are required to establish Total Maximum Daily Loads (TMDLs) according to a priority ranking.

EPA's Water Quality Planning and Management regulations include requirements related to the implementation of Section 303(d) of the CWA (40 CFR 130.7). The regulations require states to identify water quality limited waters still requiring TMDLs every two years. The list of waters still needing TMDLs must also include priority rankings and must identify the waters targeted for TMDL development during the next two years (40 CFR 130.7). On March 31, 2000, EPA promulgated a revision to this regulation that waived the requirement for states to submit Section 303(d) lists in 2000 except in cases where a court order, consent decree, or settlement agreement required EPA to take action on a list in 2000 (65 FR 17170).

Consistent with EPA's regulations, Louisiana submitted to EPA its listing decisions under Section 303(d) on February 12, 2007 with subsequent corrections submitted on September 20, 2007. On October 19, 2007, EPA approved Louisiana's listing of 347 water body-pollutant combinations and associated priority rankings. EPA disapproved Louisiana's decisions not to list 136 water waterbody pollutant combinations. EPA identified these additional waters and pollutants along with priority rankings for inclusion on the 2006 Section 303(d) List. EPA solicits public comment on its identification of 136 additional waters and associated pollutants for inclusion on Louisiana's 2006 Section 303(d) List.
