

47 CFR 74.783(e) permits any low power television (LPTV) station to request a four-letter call sign after receiving its construction permit. All initial LPTV construction permits will continue to be issued with a five-character LPTV call sign. LPTV respondents are required to use the on-line electronic system. To enable these respondents to use this on-line system, the Commission eliminated the requirement that holders of LPTV construction permits submit with their call sign requests a certification that the station has been constructed, that physical construction is underway at the transmitter site, or that a firm equipment order has been placed.

47 CFR 74.783(b) requires licensees of television translators whose station identification is made by the television station whose signals are being rebroadcast by the translator, must secure agreement with this television licensee to keep in its file, and available to FCC personnel, the translator's call letters and location, giving the name, address and telephone number of the licensee or service representative to be contacted in the event of malfunction of the translator.

47 CFR 74.1283(c)(1) requires FM translator stations whose station identification is made by the primary station to furnish current information on the translator's call letters and location. This information is kept in the primary station's files. This information is used to contact the translator licensee in the event of malfunction of the translator.

Title: Digital Audio Broadcasting Systems and Their Impact on the Terrestrial Radio Broadcast Service Broadcast Station Annual Employment Report.

Form Number: Not applicable.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents: 710.

Estimated Time per Response: 2.0 hours.

Frequency of Response: On occasion reporting requirement.

Total annual burden: 1,420 hours.

Total Annual Costs: None.

Nature of Response: Required to obtain or retain benefits.

Confidentiality: No need for confidentiality required.

Privacy Impact Assessment(s): No impact(s).

Needs and Uses: On May 31, 2007, the Commission released the Second Report and Order, Digital Audio Broadcasting (DAB) Systems and Their Impact on the Terrestrial Radio

Broadcast Service ("Second Order"), FCC 07-33, MM Docket 99-325. Provisions of the Second Order require radio station licensees to provide information necessary for the implementation of interim hybrid digital operations. Implementation of hybrid digital operations is entirely voluntary.

47 CFR 73.404(b) states in situations where interference to other stations is anticipated or actually occurs, AM licensees may, upon notification to the Commission, reduce the power of the primary DAB sidebands by up to 6 dB. Any greater reduction of sideband power requires prior authority from the Commission via the filing of a request for special temporary authority or an informal letter request for modification of license.

47 CFR 73.404(e) states licensees which include commercial and noncommercial AM and FM radio stations must provide notification to the Commission in Washington, DC, within 10 days of commencing IBOC digital operation. The notification must include the following information:

(1) Call sign and facility identification number of the station;

(2) Date on which in-band, on channel (IBOC) operation commenced;

(3) Certification that the IBOC DAB facilities conform to permissible hybrid specifications;

(4) Name and telephone number of a technical representative the Commission can call in the event of interference;

(5) Certification that the analog effective radiated power remains as authorized;

(6) Transmitter power output; if separate analog and digital transmitters are used, the power output for each transmitter;

(7) If applicable, any reduction in an AM station's primary digital carriers;

(8) If applicable, the geographic coordinates, elevation data, and license file number of the auxiliary antenna employed by an FM station as a separate digital antenna;

(9) If applicable, for FM systems employing interleaved antenna bays, a certification that adequate filtering and/or isolation equipment has been installed to prevent spurious emissions in excess of the limits specified in § 73.317;

(10) A certification that the operation will not cause human exposure to levels of radio frequency radiation in excess of the limits specified in § 1.1310 of the Commission's rules and is therefore categorically excluded from environmental processing pursuant to § 1.1306(b). Any station that cannot

certify compliance must submit an environmental assessment ("EA") pursuant to § 1.1311 and may not commence IBOC operation until such EA is ruled upon by the Commission.

Implementation of the notification will eliminate both the need for the FCC staff to issue a Special Temporary Authority (STA) to the broadcaster and for the broadcaster to file and pay the initial and any subsequent filing fees.

Public Information Collections Approved by Office of Management and Budget

October 22, 2007.

The Federal Communications Commission (FCC) has received Office of Management and Budget (OMB) approval for the following public information collections pursuant to the Paperwork Reduction Act of 1995, Public Law 104-13. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid control number. For further information contact, Terry Conway, Federal Communications Commission, 445 12th Street, SW., Washington DC 20554, (202) 418-0950 or via the Internet at Terry.Conway@fcc.gov.

OMB Control No.: 3060-0779.

Expiration Date: 9/30/10.

Effective Date: 9/24/07.

Title: Amendment of Part 90 of the Commission's Rules to Provide for Use of the 220 MHz Band by the Private Land Mobile Radio Service (PLMRS), PR Docket No. 89-552.

Form No.: N/A.

Estimated Annual Burden: 2,313 responses; 23,433 total annual burden hours; 2-20 hours per respondent; and \$657,500 annual costs.

Needs and Uses: This collection includes rules to govern the future operation and licensing of the 220-222 MHz band (220 MHz service). In establishing this licensing plan, the FCC's goal is to establish a flexible regulatory framework that allows for efficient licensing of the 220 MHz service, eliminates unnecessary regulatory burdens, and enhances the competitive potential of the 220 MHz service in the mobile service marketplace. However, as with any

licensing and operational plan for a radio service, a certain number of regulatory and information collection and burdens are necessary to verify licensee compliance with FCC rules.

Federal Communications Commission.
