Interconnection Queuing Practices; Notice of Technical Conference

November 2, 2007.

Take notice that a staff-led technical conference will be held on Tuesday, December 11, 2007 from approximately 9 a.m. to 4 p.m. (EST) in the Commission Meeting Room of the Federal Energy Regulatory Commission at 888 First Street NE., Washington, DC 20426. Commissioners may attend. An additional notice of this technical conference will be issued at a later date finalizing the agenda.

In 2003, the Commission issued Order No. 2003 to standardize the agreements and procedures related to the interconnection of large generating facilities.¹ The industry has now had

four years of experience with the management of interconnection queues since the issuance of Order No. 2003, during which time a number of queue-related issues have arisen. The Commission understands that a large amount of new generation is planned to be added to the nation's electric system in the near future, including unprecedented levels of renewable generation that may face queue-related challenges in addition to those faced by traditional generation.

Through this conference, Commission staff seeks information as to any queue issues that may have arisen since issuance of Order No. 2003 and solutions that may have been developed or proposed to deal with those queue issues. Staff wishes to explore any existing practices that have proven effective in addressing interconnection queue problems experienced by both traditional and renewable generation.

Commission staff is now soliciting nominations for speakers at the technical conference. Persons wishing to nominate themselves as speakers should do so using the following electronic link: <https://www.ferc.gov/whats-new/registration/inter-queuing-practices-12-11-speaker-form.asp>. Such nominations must be made before the close of business on Friday, November 15, 2007, so that an agenda for the technical conference can be drafted and published. Speakers may propose specific topics that they believe should be addressed at the conference.

Transcripts of the conference will be immediately available from Ace Reporting Company (202-347-3700 or 1-800-336-6646) for a fee. They will be available for the public on the Commission's eLibrary system seven calendar days after FERC receives the transcript.

[ER-FRL-6692-8]

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared pursuant to the Environmental Review Process (ERP), under section 309 of the Clean Air Act and Section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at 202-564-7167.

An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 6, 2007 (72 FR 17156).

Draft EISs

EIS No. 20070307, ERP No. D-USA-A11079-00, Permanent Home Stationing of the 2/25th Stryker Brigade Combat Team (SBECT), To Address a Full Range of Alternatives for Permanently Stationing the 2/25th SBCT, Hawaii and Honolulu Counties, HI; Anchorage and Southeast Fairbanks Boroughs, AK; El Paso, Pueblo, and Fremont Counties, CO.

Summary: EPA expressed environmental concerns about the cumulative impacts related to the recent decision to resume year-round training operations in the Eagle River Flats area at Fort Richardson, AK. EPA recommended a cumulative impact analysis, particularly on water resources and the Cook Inlet Beluga whale population in this area. Rating EC2.

EIS No. 20070330, ERP No. D-IBW-K36148-CA, PROGRAMMATIC—Tijuana River Flood Control Project, Proposing a Range of Alternatives for Maintenance Activities and Future Improvements, San Diego County, CA. *Summary:* EPA expressed environmental concerns about air and water quality, and requested that best management practices be incorporated into the project to reduce impacts Rating EC2.

EIS No. 20070372, ERP No. D-BLM-E60016-00, Alabama and Mississippi Resource Management Plan, Analyzes Management Alternatives for the Public Land and Resources, in Portions of the States of Alabama and Mississippi.

Summary: EPA supports BLM's suite of management alternatives. However, EPA expressed environmental concerns about the lack of detailed discussion of waste water disposal given the potential for impacts to water quality. A more detailed discussion of Alabama's and Mississippi's underground injection well control (IUC) programs should be provided in the final EIS. Rating EC2.

EIS No. 20070390, ERP No. DS-AFS-L65382-ID, Meadow Face Stewardship Pilot Project, Improvement to Aquatic and Terrestrial Vegetative Conditions, Supplement Information on the Cumulative Effects Analysis, Nez Perce National Forest, Clearwater Ranger District, Idaho County, ID.
