

including taxicabs, hotel, and airport shuttles will be inspected before being allowed on campus. Visitors will be asked to show one form of identification (for example, a government-issued photo ID, driver's license, or passport) and to state the purpose of their visit.

Information is also available on the Institute's/Center's home page: <http://www4.od.nih.gov/oba/>, where an agenda and any additional information for the meeting will be posted when available.

OMB's "Mandatory Information Requirements for Federal Assistance Program Announcements" (45 FR 39592, June 11, 1980) requires a statement concerning the official government programs contained in the Catalog of Federal Domestic Assistance. Normally NIH lists in its announcements the number and title of affected individual programs for the guidance of the public. Because the guidance in this notice covers virtually every NIH and Federal research program in which DNA recombinant molecule techniques could be used, it has been determined not to be cost effective or in the public interest to list these programs. Such a list would likely require several additional pages. In addition, NIH could not be certain that every Federal program would be included as many Federal agencies, as well as private organizations, both national and international, have elected to follow the NIH Guidelines. In lieu of the individual program listing, NIH invites readers to direct questions to the information address above about whether individual programs listed in the Catalog of Federal Domestic Assistance are affected.

(Catalogue of Federal Domestic Assistance Program Nos. 93.14, Intramural Research Training Award; 93.22, Clinical Research Loan Repayment Program for Individuals from Disadvantaged Backgrounds; 93.232, Loan Repayment Program for Research Generally; 93.39, Academic Research Enhancement Award; 93.936, NIH Acquired Immunodeficiency Syndrome Research Loan Repayment Program; 93.187, Undergraduate Scholarship Program for Individuals from Disadvantaged Backgrounds, National Institutes of Health, HHS)

SUPPLEMENTARY INFORMATION: The Department of Homeland Security (DHS) Privacy Office is holding a public workshop to bring together leading government, academic, policy, and international experts to discuss the impact on privacy and civil liberties of closed circuit television (CCTV). This workshop will provide a forum to begin a discussion to inform development of best practices for the use of CCTV by government agencies. This public workshop is particularly timely given that government agencies at all levels are expressing interest in the use of CCTV, and DHS has awarded a number of grants that have been used to facilitate its use. The workshop will explore how CCTV technology can be used in a manner that respects the privacy and civil liberties of the American public. Development of best practices for the use of this technology will aid in building public trust that privacy and civil liberties will be considered when making decisions to use CCTV. The two-day workshop will consist of a series of panel discussions exploring a variety of perspectives regarding the use of CCTV, including technology, law enforcement, community, international, and legal and policy perspectives. The workshop will culminate in a panel discussion on best practices for CCTV, during which panelists will share their various perspectives and individual recommendations. Workshop attendees will have an opportunity to ask questions after each panel.

The workshop is open to the public, and no fee is required for attendance.

Topics for Comment: To develop a comprehensive record regarding best practices for CCTV, the DHS Privacy Office also invites interested parties to submit written comments as described below. Comments should be received on or before Friday, November 30, 2007, and should be as specific as possible. The Privacy Office is particularly

interested in receiving comments on the following topics:

1. Are there existing state, local, or international programs that have developed privacy and civil liberties guidelines for CCTV that can serve as resources for the development of best practices?
2. How can CCTV systems be designed in a manner that respects privacy and civil liberties?
3. What measures are necessary to protect privacy and civil liberties when governments have the ability to link into privately owned CCTV networks or have access to images and footage that such networks have captured?
4. How can Privacy Impact Assessments (PIAs) be used as a means of protecting privacy in this area? What would make for an effective PIA? How can government agencies incorporate the findings of PIAs into their CCTV networks and guidelines?
5. What are the privacy and civil liberties best practices you would recommend for government use of CCTV?
