NUCLEAR REGULATORY COMMISSION

[Docket No. 70-143]

Eastman Kodak Company; Environmental Assessment and Finding of No Significant Impact Related to Proposed License Amendment Authorizing Exemption to 10 CFR 70.24

AGENCY: Nuclear Regulatory Commission.

ACTION: Environmental Assessment and Finding of No Significant Impact.

FOR FURTHER INFORMATION CONTACT:

Mary T. Adams, Fuel Manufacturing Branch, Division of Fuel Cycle Safety and Safeguards, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Mail Stop E-2C40M, Washington, DC 20555-0001, telephone (301) 492-3113 and e-mail mta@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) staff is considering a request to amend Materials License SNM-1513, issued to Eastman Kodak Company (Kodak), to authorize an exemption to the criticality accident alarm system requirements of 10 CFR 70.24. The NRC has prepared an Environmental Assessment (EA) in support of this action. Based upon the EA, the NRC has concluded that a Finding of No Significant Impact (FONSI) is appropriate and, therefore, an Environmental Impact Statement (EIS) will not be prepared.

II. Environmental Assessment

Introduction: Eastman Kodak Company (Kodak) in Rochester, New York, has been licensed since 1966 to possess and use special nuclear material (SNM) in a research and development (R&D) facility. This license was issued pursuant to 10 CFR part 70, Domestic Licensing of Special Nuclear Material. In July 2006, Kodak notified NRC that it had ceased principal activities and intended to decommission the facility and terminate the SNM license. Before decommissioning activities can begin, Kodak intends to remove the SNM by packaging the material and transporting it to a Department of Energy facility.

Kodak possessed and used the SNM in the R&D facility with an exemption from nuclear criticality accident alarm system requirements of 10 CFR 70.24; NRC granted this exemption because the configuration of the SNM was fixed and a criticality accident was not credible. Kodak will change the SNM configuration during packaging, and will provide portable criticality accident alarms for the packaging activity. After packaging the SNM, Kodak will move the packages from the R&D facility through a long corridor to a loading dock where the packages will be loaded onto a truck for transport off the Kodak site. Kodak requested an exemption from the alarm system requirements for the corridor and loading dock, on the basis that the configuration of the SNM in the transportation packages was such that an accidental criticality is not credible. NRC staff reviewed the exemption request and determined that
