The *Interoperability FNPRM* proposed the following information collection requirements involving an open, global database of VRS proxy numbers. The Interoperability FNPRM sought comment on: (1) Whether VRS providers should be required to provide information to populate an open, global database of VRS proxy numbers and to keep the information current; (2) whether the Interstate TRS Fund administrator, a separate entity, or a consortium of service providers should be responsible for the maintenance and operation of an open, global database of VRS proxy numbers; (3) whether Deaf and hard of hearing individuals using video broadband communication need uniform and static end-point numbers should be linked to the North American Numbering Plan (NANP) that would remain consistent across all VRS providers so that they can contact one another and be contacted to the same extent that Public Switched Telephone Network (PSTN) and VoIP users are able to identify and call one another; (4) whether participation by service providers should be mandatory so that all VRS users can receive incoming calls.
