(b) * * *

(1) Allow a public safety licensee to advise the 746–757, 758–763, 776–787, or 788–793 MHz band licensee whether it believes a proposed base or fixed station will generate unacceptable interference;

(2) Permit 746–757, 758–763, 776–787, and 788–793 MHz band licensees to make voluntary changes in base or fixed station parameters when a public safety licensee alerts them to possible interference; and,

(c) * * *

(1) Upon request by a 746–757, 758–763, 776–787, or 788–793 MHz band licensee, public safety licensees authorized to operate radio systems in the 763–775 and 793–805 MHz bands shall provide the operating parameters of their radio system to the 746–757, 758–763, 776–787, or 788–793 MHz band licensee.

(2) Public safety licensees who perform the information exchange described in this section must notify the appropriate 746–757, 758–763, 776–787, or 788–793 MHz band licensees prior to any technical changes to their radio system.

Atlantic Highly Migratory Species; Atlantic Commercial Shark Management Measures

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: This final rule establishes the 2008 first trimester season commercial quotas for large coastal sharks (LCS), small coastal sharks (SCS), and pelagic sharks based on over- or underharvests from the 2007 first trimester season. This action provides advance notice of quotas and season dates for the Atlantic commercial shark fishery. It also ensures the measures in this action are in place until they are replaced by those implemented under Amendment 2 to the Highly Migratory Species (HMS) Consolidated Fishery Management Plan (FMP) even if Amendment 2 is finalized after the start of the second trimester season (May 1, 2008). As such, this action constitutes the regulatory action to determine quotas and season lengths for LCS, SCS and pelagic sharks for the 2008 second trimester season. However, if Amendment 2 to the HMS FMP is unexpectedly delayed beyond the end of the 2008 second trimester season, NMFS may consider a rulemaking for the 2008 third trimester seasons. NMFS would announce any additional action for the second and third seasons in a future **Federal Register** notice.

DATES: This rule is effective January 1, 2008. The Atlantic commercial shark fishing season opening and closing dates and quotas for the 2008 first and second trimester seasons are provided in Tables 1 and 2, respectively, under **SUPPLEMENTARY INFORMATION.**

Flexibility Analysis (EA/RIR/FRFA), please write to Highly Migratory Species Management Division, 1315 East-West Highway, Silver Spring, MD 20910, or at (301) 713–1917 (fax). Copies are also available from the HMS website at <http://www.nmfs.noaa.gov/sfa/hms/> or from www.regulations.gov.

SUPPLEMENTARY INFORMATION:

Background

The Atlantic shark fishery is managed under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). The Consolidated HMS FMP for Atlantic Sharks, Tunas, Swordfish and Billfish is implemented by regulations at 50 CFR part 635.

Currently, the Atlantic shark annual commercial quotas, with the exception of pelagic sharks, are split among three regions based on historic landings (1999–2003). Consistent with 50 CFR 635.27(b)(1)(iii) and (iv), the annual LCS baseline quota (1,017 mt dw) is split among the three regions as follows: 52 percent to the Gulf of Mexico, 41 percent to the South Atlantic, and 7 percent to the North Atlantic. The annual SCS baseline quota (454 mt dw) is split among the three regions as follows: 48 percent to the Gulf of Mexico, 49 percent to the South Atlantic, and 3 percent to the North Atlantic. The regional quotas for LCS and SCS are divided equally between the trimester seasons in the South Atlantic and the Gulf of Mexico, and according to historical landings in the North Atlantic.

Consistent with 50 CFR 635.27(b)(1)(vi), any over- or underharvest in a given region from the 2007 first trimester season will be carried over to the 2008 first trimester season in that region.

As stated in the proposed rule, existing regulations do not allow underharvests of pelagic sharks to be carried forward to the next fishing management period. Therefore, the 2008 first trimester pelagic shark quotas do not need to be reduced consistent with the current regulations at 50 CFR 635.27(b)(1)(vi)(B). The 2008 first trimester season quotas for pelagic, blue, and porbeagle sharks are proposed to be 162.7 mt dw (358,688 lb dw), 91 mt dw (200,619 lb dw), and 30.7 mt dw (67,681 lb dw), respectively. The pelagic shark season would open on January 1, 2008 and would close when quotas are projected to be reached with a
