

extinction. The first step in the recovery strategy for the species is to protect and stabilize the existing population. This includes management to maintain an open habitat; noxious weed control; minimizing the damage of collection and trampling within the population; seed collection and long-term seed banking to protect the genetic resources of the species; and the development and implementation of management plans. In addition, to reduce the potential for extinction due to loss of the single population, recovery actions will likely require establishing additional populations within the estimated historical range of the species.

The recovery of *Hackelia venusta* is complicated by the very small size and limited distribution of the single population, as well as by the extreme instability of the habitat where it occurs. Monitoring activities have the potential to destabilize the habitat and damage or even kill plants, particularly young germinants; therefore the need for monitoring and data collection must be carefully weighed against the possible negative impacts of such actions.

Authority

The authority for this action is section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).

Dated: November 15, 2007.

Regional Director, Region 1, U.S. Fish and Wildlife Service.

SUPPLEMENTARY INFORMATION:

Title: 30 CFR 282, Operations in the Outer Continental Shelf for Minerals Other than Oil, Gas, and Sulphur.

OMB Control Number: 1010-0081.

Abstract: The Outer Continental Shelf (OCS) Lands Act, as amended (43 U.S.C. 1334 and 43 U.S.C. 1337(k)), authorizes the Secretary of the Interior (Secretary) to implement regulations to grant to the qualified persons, offering the highest cash bonus on a basis of competitive bidding, leases of any mineral other than oil, gas, and sulphur. This applies to any area of the Outer Continental Shelf not then under lease for such mineral upon such royalty, rental, and other terms and conditions as the Secretary may prescribe at the time of offering the area for lease. This regulation governs mining operations within the OCS for minerals other than oil, gas and sulphur and establishes a comprehensive leasing and regulatory program for such minerals. These regulations have been designed to (1) recognize the differences between the OCS activities associated with oil, gas, and sulphur discovery and development, and those associated with

the discovery and development of other minerals; (2) facilitate participation by States directly affected by OCS mining activities; (3) provide opportunities for consultation and coordination with other OCS users and uses; (4) balance development with environmental protection; (5) insure a fair return to the public; (6) preserve and maintain free enterprise competition; and (7) encourage the development of new technology.

Regulations implementing these responsibilities are under 30 CFR part 282. Responses are mandatory. No questions of a "sensitive" nature are asked. We protect proprietary information according to the Freedom of Information Act (5 U.S.C. 552) and its implementing regulations (43 CFR 2), and 30 CFR 282.5, 282.6, and 282.7 and applicable sections of 30 CFR parts 280 and 281.

The MMS would use the information required by 30 CFR 282 to determine if lessees are complying with the regulations that implement the mining operations program for minerals other than oil, gas, and sulphur. Specifically, MMS would use the information:

- To ensure that operations for the production of minerals other than oil,

gas, and sulphur in the OCS are conducted in a manner that will result in orderly resource recovery, development, and the protection of the human, marine, and coastal environments.

- To ensure that adequate measures will be taken during operations to prevent waste, conserve the natural resources of the OCS, and to protect the environment, human life, and correlative rights.

- To determine if suspensions of activities are in the national interest, to facilitate proper development of a lease including reasonable time to develop a mine and construct its supporting facilities, or to allow for the construction or negotiation for use of transportation facilities.

- To identify and evaluate the cause(s) of a hazard(s) generating a suspension, the potential damage from a hazard(s) and the measures available to mitigate the potential for damage.

- For technical and environmental evaluations which provide a basis for MMS to make informed decisions to approve, disapprove, or require modification of the proposed activities.

There has been no activity in the OCS for minerals other than oil, gas, and

sulphur for many years and no information collected since we allowed the OMB approval to expire in 1991. However, because these are regulatory requirements, the potential exists for information to be collected and we are requesting that OMB reinstate this collection of information.

Frequency: Monthly, and as a result of situations encountered.

Estimated Number and Description of Respondents: There are no active respondents; therefore, we estimated the potential annual number of respondents to be one.

Estimated Reporting and Recordkeeping "Hour" Burden: The estimated annual hour burden for this information collection is a total of 201 hours. The following chart details the individual components and estimated hour burdens. In calculating the burdens, we assumed that respondents perform certain requirements in the normal course of their activities. We consider these to be usual and customary and took that into account in estimating the burden.

Estimated Reporting and Recordkeeping "Non-Hour Cost" Burden: We have identified one cost burden; § 282.13(e)(1), would require a site-specific study to determine and evaluate hazards that result in a

suspension of operation. Since a study has never been done previously, MMS estimates that this study would cost approximately \$100,000. There are no other non-hour cost burdens associated with the collection of information.

Public Disclosure Statement: The PRA (44 U.S.C. 3501, *et seq.*) provides that an agency may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number. Until OMB approves a

collection of information, you are not obligated to respond.

Comments: Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3501, *et seq.*) requires each agency “* * * to provide notice * * * and otherwise consult with members of the public and affected agencies concerning each proposed collection of information * * *”. Agencies must specifically solicit comments to: (a) Evaluate whether the proposed collection of information is necessary for the agency to perform its duties, including whether the information is useful; (b) evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information; (c) enhance the quality, usefulness, and clarity of the information to be collected; and (d) minimize the burden on the respondents, including the use of automated collection techniques or other forms of information technology.

To comply with the public consultation process, on August 8, 2007, we published a **Federal Register** notice (72 FR 44570) announcing that we would submit this ICR to OMB for approval. The notice provided the required 60-day comment period. In addition, § 282.0 provides the OMB control number for the information collection requirements imposed by the 30 CFR 282 regulations. The PRA (5 U.S.C. 1320) informs the public that they may comment at any time on the collection of information and MMS provides the address to which they should send comments. We have received no comments in response to these efforts.

If you wish to comment in response to this notice, you may send your comments to the offices listed under the **ADDRESSES** section of this notice. The OMB has up to 60 days to approve or disapprove the information collection but may respond after 30 days. Therefore, to ensure maximum consideration, OMB should receive public comments by January 11, 2008.

Public Availability of Comments: Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time.
