DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the National Coordinator for Health Information Technology; American Health Information Community Electronic Health Records Workgroup Meeting

ACTION: Announcement of meeting.

SUMMARY: This notice announces the 21st meeting of the American Health Information Community Chronic Care Workgroup in accordance with the Federal Advisory Committee Act (Pub. L. 92-463, 5 U.S.C., App.)

DATES: January 17, 2008, from 1 p.m. to 4 p.m., Eastern Time.

ADDRESSES: Mary C. Switzer Building (330 C Street, SW., Washington, DC 20201), Conference Room 4090. Please bring photo ID for entry to a Federal building.

FOR FURTHER INFORMATION CONTACT: <http://www.hhs.gov/healthit/ahic/chronicare/>

SUPPLEMENTARY INFORMATION: The Workgroup will hear testimony on ways to use information technology to better coordinate care for patients with chronic conditions and will discuss this information in light of opportunities to better facilitate patient care coordination.

The meeting will be available via Web cast. For additional information, go to:

http://www.hhs.gov/healthit/ahic/chnoccare/cc_instruct.html.

Agency Forms Undergoing Paperwork Reduction Act Review

The Centers for Disease Control and Prevention (CDC) publishes a list of information collection requests under review by the Office of Management and Budget (OMB) in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these requests, call the CDC Reports Clearance Officer at (404) 639-5960 or send an e-mail to omb@cdc.gov. Send written comments to CDC Desk Officer, Office of Management and Budget, Washington, DC or by fax to (202) 395-6974. Written comments should be received within 30 days of this notice.

Proposed Project

Experimental and Theoretical Study of Early Detection and Isolation of Influenza—New—The National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Federal Occupational Safety and Health Act of 1970, section 501, enables NIOSH to carry out research relevant to the health and safety of workers. Some diseases like influenza and Severe Acute Respiratory Syndrome (SARS) can be spread when people produce clouds of droplets (called aerosols) by coughing or sneezing. Aerosol transmission of infectious diseases is of particular interest today because of increased concern over a possible global influenza pandemic. The possible airborne spread of influenza is especially important to health-care workers and emergency responders, who face a much greater risk of exposure than does the general public. However, substantial gaps exist in our understanding of the generation and spread of infectious aerosols containing influenza. This lack of information hampers the ability of health scientists to model and predict the transmission of influenza by airborne particles and to understand whether or not aerosols are likely to be an important route of transmission of influenza during a pandemic.

The purpose of this study is to gain a better understanding of the production and dissemination of aerosols containing the influenza virus. The results of this research will give
