regulations controlling emissions from existing stationary diesel engines.

E. What are appropriate methods of ensuring compliance with such requirements, including recordkeeping and testing issues?

Given the large population of stationary diesel engines and our lack of information on the location and owners and operators of these engines, EPA requests comment on effective methods to ensure compliance with any emission reduction requirements. EPA also requests comment on the extent to which the owners and operators of these engines are small businesses and on what the appropriate regulatory compliance requirements should be for those entities. EPA is especially interested in ways to minimize the monitoring burden to individual owners and operators, while maintaining an appropriate level of environmental protection.

# IV. How EPA Intends To Proceed Following Publication of This Notice

Following the closing of the comment period for this notice, EPA will summarize and analyze the comments received. The summary and analysis will be used to help develop and inform the notice of proposed rulemaking that will follow this notice.

# V. Statutory and Executive Order Reviews

Under Executive Order (EO) 12866 (58 FR 51735, October 4, 1993), this action is a "significant regulatory action." Accordingly, EPA submitted this action to the Office of Management and Budget (OMB) for review under EO 12866 and any changes made in response to OMB recommendations have been documented in the docket for this action. Generally, because this action is "advanced" in nature and does not, therefore, propose any requirements on any entities, the various administrative requirements EPA must address in the rulemaking process are not applicable. When EPA issues a notice of proposed rulemaking that contains proposed emissions standards for stationary diesel engines, EPA will address those requirements.

# DEPARTMENT OF HOMELAND SECURITY

## Federal Emergency Management Agency

#### 44 CFR Part 67

[Docket No. FEMA-B-7759]

# Proposed Flood Elevation Determinations

**AGENCY:** Federal Emergency Management Agency, DHS. **ACTION:** Proposed rule.

**SUMMARY:** Comments are requested on the proposed Base (1 percent annualchance) Flood Elevations (BFEs) and proposed BFE modifications for the communities listed in the table below. The purpose of this notice is to seek general information and comment regarding the proposed regulatory flood elevations for the reach described by the downstream and upstream locations in the table below. The BFEs and modified BFEs are a part of the floodplain management measures that the community is required either to adopt or show evidence of having an effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP). In addition, these elevations, once finalized, will be used by insurance agents, and others to calculate appropriate flood insurance premium rates for new buildings and the contents in those buildings.

**DATES:** Comments are to be submitted on or before April 23, 2008.

ADDRESSES: The corresponding preliminary Flood Insurance Rate Map (FIRM) for the proposed BFEs for each community are available for inspection at the community's map repository. The respective addresses are listed in the table below.

You may submit comments, identified by Docket No. FEMA-B-7759, to William R. Blanton, Jr., Chief, Engineering Management Branch, Mitigation Directorate, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (202) 646-3151, or (e-mail) bill.blanton@dhs.gov.

# FOR FURTHER INFORMATION CONTACT:

William R. Blanton, Jr., Chief, Engineering Management Branch, Mitigation Directorate, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (202) 646–3151 or (e-mail) bill.blanton@dhs.gov.

# **SUPPLEMENTARY INFORMATION:** The Federal Emergency Management Agency (FEMA) proposes to make

determinations of BFEs and modified BFEs for each community listed below, in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed BFEs and modified BFEs, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations are used to meet the floodplain management requirements of the NFIP and are also used to calculate the appropriate flood insurance premium rates for new buildings built after these elevations are made final, and for the contents in these buildings.

Comments on any aspect of the Flood Insurance Study and FIRM, other than the proposed BFEs, will be considered. A letter acknowledging receipt of any comments will not be sent.

Administrative Procedure Act Statement. This matter is not a rulemaking governed by the Administrative Procedure Act (APA), 5 U.S.C. 553. FEMA publishes flood elevation determinations for notice and comment; however, they are governed by the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and the National Flood Insurance Act of 1968, 42 U.S.C. 4001 et seq., and do not fall under the APA.

National Environmental Policy Act. This proposed rule is categorically excluded from the requirements of 44 CFR part 10, Environmental Consideration. An environmental impact assessment has not been prepared.

Regulatory Flexibility Act. As flood elevation determinations are not within the scope of the Regulatory Flexibility Act, 5 U.S.C. 601–612, a regulatory flexibility analysis is not required.

Executive Order 12866, Regulatory Planning and Review. This proposed rule is not a significant regulatory action under the criteria of section 3(f) of Executive Order 12866, as amended.

Executive Order 13132, Federalism. This proposed rule involves no policies that have federalism implications under Executive Order 13132.

Executive Order 12988, Civil Justice Reform. This proposed rule meets the applicable standards of Executive Order 12988.

# List of Subjects in 44 CFR Part 67

Administrative practice and procedure, Flood insurance, Reporting and recordkeeping requirements.

Accordingly, 44 CFR part 67 is proposed to be amended as follows:

# PART 67—[AMENDED]

1. The authority citation for part 67 continues to read as follows:

**Authority:** 42 U.S.C. 4001 *et seq.*; Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp., p. 329; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp., p. 376.

# §67.4 [Amended]

2. The tables published under the authority of § 67.4 are proposed to be amended as follows:

### 44 CFR Part 67

[Docket No. FEMA-B-7739]

Withdrawal of Proposed Flood Elevation Determination for the Unincorporated Areas of Richland County, SC

**AGENCY:** Federal Emergency Management Agency, DHS. **ACTION:** Proposed rule; withdrawal.

**SUMMARY:** The Federal Emergency Management Agency (FEMA) withdraws the proposed flood elevation determination published October 16, 2007 for the Unincorporated Areas of Richland County, South Carolina (72 FR 58598).

DATES: The proposed flood elevation determination published on October 16, 2007 at 72 FR 58598, the September 12, 2007 Physical Map Revision, and the November 1, 2007 to January 31, 2008 appeal period associated with the withdrawn proposed flood elevation determinations are withdrawn as of January 24, 2008.

#### FOR FURTHER INFORMATION CONTACT:

William R. Blanton, Jr., Chief, Engineering Management Branch, Mitigation Directorate, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (202) 646–3151 or e-mail bill.blanton@dhs.gov.

SUPPLEMENTARY INFORMATION: On September 12, 2007, FEMA issued Preliminary Flood Insurance Rate Maps (FIRMs) through a Physical Map Revision to identify flood hazards along the Congaree River in the Unincorporated Areas of Richland County, South Carolina, hereafter referred to as "Richland County". On October 16, 2007, FEMA published a proposed rule at 72 FR 58598, October 16, 2007 proposing flood elevation determinations along the Congaree River

in Richland County. On October 17, 2007, FEMA issued a letter to the Chairman of the Richland County Council explaining that the appeal period for the proposed flood elevation determinations would begin on November 1, 2007 and end on January 31, 2008.

The purpose of this **Federal Register** publication is to withdraw the proposed flood elevation determination published October 16, 2007 at 72 FR 58598 for the Unincorporated Areas of Richland County, South Carolina. This document also provides notice that FEMA has withdrawn the September 12, 2007 Physical Map Revision and canceled the November 1, 2007 to January 31, 2008 appeal period associated with the withdrawn proposed flood elevation determinations. The reason for this withdrawal and cancelation is to address a federal district court's November 14, 2007 finding that the October 16, 2007 notice proposing new flood elevation determinations for the Congaree River in the unincorporated areas of Richland County did not comply with the Court's November 18, 2005 Order of Vacatur. FEMA intends to initiate a new revision and propose new flood hazard information; however, affected areas should utilize the effective flood hazard information, in

<sup>+</sup> North American Vertical Datum.
