

Regulation Affected: 30 CFR 77.214 (Refuse piles; general).

Modification Request: The petitioner requests a modification of the existing standard to permit coarse refuse fill to be constructed over abandoned underground mine openings because the mines are abandoned and all reserves in these mines have been depleted. The petitioner states that: (1) There are no safety issues that might affect any underground miners; (2) surface workers at the coal preparation plant will be protected by clearly identifying the openings and insuring that the openings are sealed and/or provided drainage. The petitioner further states that: (1) The openings at issue have been abandoned since as early as the mid-1900's and as late as the late 1990's and represent no threat to underground miners because all of the affected mine workings/openings are abandoned; (2) there are no active underground mine workings above or below the abandoned coal seams in this area; and (3) there are no active workings within 2,000 feet of the coarse refuse fill. The petitioner asserts that the proposed alternative method will achieve and guarantee the same measure of protection afforded by the standard.

Dated: January 17, 2008.

Deputy Director, Office of Standards, Regulations, and Variances.

NUCLEAR REGULATORY COMMISSION

Entergy Nuclear Fitzpatrick, LLC, and Entergy Nuclear Operations, Inc., James A. Fitzpatrick Nuclear Power Plant; Notice of Availability of the Final Supplement 31 to the Generic Environmental Impact Statement for License Renewal of Nuclear Plants, Regarding the License Renewal of James A. Fitzpatrick Nuclear Power Plant, Docket No. 50–333

Notice is hereby given that the U.S. Nuclear Regulatory Commission (NRC, Commission) has published a final site-specific supplement to the “Generic Environmental Impact Statement for License Renewal of Nuclear Plants (GEIS),” NUREG–1437, regarding the renewal of operating license DPR–59 for an additional 20 years of operation for the James A. FitzPatrick Nuclear Power Plant (JAFNPP). JAFNPP is located on Lake Ontario in Oswego County, approximately seven miles northeast of the City of Oswego, New York. Possible alternatives to the proposed action (license renewal) include no action and reasonable alternative energy sources.

As discussed in Section 9.3 of the final Supplement 31, based on: (1) The analysis and findings in the GEIS; (2) the Environmental Report submitted by Entergy Nuclear FitzPatrick, LLC, and Entergy Nuclear Operations, Inc.; (3) consultation with Federal, State, and local agencies; (4) the NRC staff's own independent review; and (5) the NRC staff's consideration of public comments, the recommendation of the staff is that the Commission determine that the adverse environmental impacts of license renewal for JAFNPP are not so great that preserving the option of license renewal for energy-planning decision makers would be unreasonable.

The final Supplement 31 to the GEIS is publicly available at the NRC Public Document Room (PDR), located at One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852, or from the NRC's Agencywide Documents Access and Management System (ADAMS).

The ADAMS Public Electronic Reading Room is accessible at <http://adamswebsearch.nrc.gov/dologin.htm>. The Accession Number for the final Supplement 31 to the GEIS is ML080170183. Persons who do not have access to ADAMS, or who encounter problems in accessing the documents located in ADAMS, should contact the NRC's PDR reference staff by telephone at 1–800–397–4209, or 301–415–4737, or by e-mail at pdr@nrc.gov.
