National Park Service

Rescind 1990 Cruise Ship Management Policy, Glacier Bay National Park & Preserve, Alaska

AGENCY: National Park Service, Interior.

ACTION: Rescind 1990 Cruise Ship Management Policy, Glacier Bay National Park & Preserve, Alaska.

SUMMARY: Effective with publication of this public notice, the National Park Service (NPS) has rescinded a policy concerning management of cruise ships in Glacier Bay National Park & Preserve which was originally published in the **Federal Register** on May 31, 1990 (FR, Vol. 55, No. 105, page 22108, 5/31/1990, FR Doc. 9012551). In summary, the policy was intended to increase opportunities for competitive award of cruise ship use days into Glacier Bay and to enhance visitor opportunities to select from a wider variety of cruise ship operations. These objectives were to be accomplished under the 1990 policy primarily by limiting the transferability of concession permits for cruise ship tours in Glacier Bay, limiting the scope of a preference in renewal of concessions permits that would otherwise apply, and granting additional renewal preferences.

However, in 1998, the Congress revised and reconfirmed the management of NPS concession contract authorizations through the NPS Concessions Management Improvement Act of 1998, Public Law 105-391, November 13, 1998. This law does not permit the continued implementation of most of the operative provisions of the 1990 policy such that the policy can no longer be implemented to achieve its objectives. Accordingly, the NPS has rescinded the 1990 policy. However, NPS does intend to continue to encourage the award of multiple concession contracts to different operators for Glacier Bay cruise operations so as to enhance visitor choices in visiting Glacier Bay by cruise ship. This will be accomplished primarily by limiting the number of cruise ship use days permitted under applicable cruise ship concessions contracts, thereby increasing the number of concession contracts available for award.

DATES: February 5, 2008.

FOR FURTHER INFORMATION CONTACT: Laura Caballero, Natural Resources Manager, Reclamation, at 916-989-7172; or Jim Micheaels, Staff Park and Recreation Specialist, State Parks, at 916-988-0513.

SUPPLEMENTARY INFORMATION: The GP/RMP is being prepared for the Folsom Lake State Recreation Area through a cooperative agreement between Reclamation and State Parks.

This planning activity encompasses approximately 20,000 acres of publicly accessible water and land owned by Reclamation and managed by State Parks' Gold Fields District. The GP/RMP will be the primary management document for the park unit, providing a

defined purpose, vision, long-term goals, and management guidelines. It will be used by State Parks as a framework for guiding decision-making related to future development potential, on-going management, and public use of the Folsom Lake State Recreation Area.

The GP/RMP attempts to enhance and expand the recreation opportunities while also providing more active protection and management of natural and cultural resources. The GP/RMP is intended to be implemented over an extended period as determined by both user demand and need. To do so, the GP/RMP provides both park wide goals and guidelines relating to natural, cultural and visual resources, water quality, circulation, visitor services, interpretation and operations as well as direction for specific zones of the park. The GP/RMP designates 34 geographic management zones, with 12 on Lake Natoma and 22 on Folsom Lake. Each zone has a specific management emphasis and is designated with one of five land use designations: Recreation-High, Recreation-Medium, Conservation, Preservation, or Administration.

The preferred alternative includes 12 recreation zones, 17 conservation zones, 3 preservation zones, and 2 administration zones. Based on this area, the management emphasis is for recreation on 91% of the aquatic area and 20% of the land area, and conservation on 74% of the land area and 9% of the aquatic area; however, it will ultimately be the responsibility of State Parks and the Parks and Recreation Commission and Reclamation to select a preferred plan for adoption, once the environmental review processes have been completed.

The EIS/EIR is a program-level analysis of the potential environmental impacts associated with adoption of the GP/RMP. The GP/RMP is intended to be predominantly self-mitigating through implementation of GP/RMP policies and management strategies, and the EIS/EIR will also include measures intended to reduce the adverse effects of the GP/RMP.

Copies of the Draft EIS/EIR are available for public review at the following locations:

- California State Parks, Folsom Lake SRA Office, 7806 Folsom Auburn Road, Folsom, CA 95630.
- Sacramento Central Library, 828 I Street, Sacramento, CA 95542.
