Title: NSPS for Polymeric Coating of Supporting Substrates Facilities (Renewal)

ICR Numbers: EPA ICR Number 1284.08, OMB Control Number 2060-0181.

ICR Status: This ICR is scheduled to expire on March 31, 2008. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while his submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: Particulate matter emissions from polymeric coating of supporting substrates facilities cause or contribute to air pollution that may reasonably be anticipated to endanger public health or welfare. Therefore, NSPS were promulgated for this source category.

The control of emissions of volatile organic compounds (VOCs) from polymeric coating of supporting substrates facilities requires not only the installation of properly designed equipment, but also the operation and maintenance of that equipment. Emissions of VOCs from polymeric coating of supporting substrates facilities are generated by each coating operation and the associated onsite coating mix preparation equipment used to prepare coatings for the polymeric coating of supporting substrates. These standards rely on: The capture of VOC emissions by a partial or total enclosure around the coating operation, and/or by

covers on each piece of affected mix preparation equipment; the reduction of VOC emissions to the atmosphere from the coating operation to a control device, and/or from the affected covered equipment to a control device; and the recovery of VOC emissions at one coating operation if the liquid material balance is used to demonstrate compliance.

In order to ensure compliance with these standards, adequate reporting and recordkeeping is necessary. In the absence of such information, enforcement personnel would be unable to determine whether the standards are being met on a continuous basis, as required by the Clean Air Act.

All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office. Notifications are used to inform the Agency or delegated authority when a source becomes subject to the standard. The reviewing authority may then inspect the source to check if the pollution control devices are properly installed and operated. Performance test reports are needed as these are the Agency's record of a source's initial capability to comply with the emission standard and note the operating conditions under which compliance was achieved. The quarterly reports are used for problem identification, as a check on source operation and maintenance, and for compliance determinations. The standard also requires semiannual reporting of deviations from monitored opacity, as this is a good indicator of the source's compliance status.

Responses to this information collection are mandatory (40 CFR part 60, subpart VVV). Any information submitted to the Agency for which a claim of confidentiality is made will be safeguarded according to the Agency policies set forth in title 40, chapter 1, part 2, subpart B—Confidentiality of Business Information (see 40 CFR part 2; 41 FR 36902, September 1, 1976; amended by 43 FR 40000, September 8, 1978; 43 FR 42251, September 20, 1978; 44 FR 17674, March 23, 1979).

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 83 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying

information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities:
Polymeric Coating of Supporting Substrates Facilities.

Estimated Number of Respondents:
53.

Frequency of Response: Initially, quarterly and semiannually.

Estimated Total Annual Hour Burden:
12,623 hours.

Estimated Total Annual Cost:
\$1,410,367, which includes \$48,500 Capital Startup costs, \$556,500 annualized Operating and Maintenance (O&M) costs, and \$805,367 annualized Labor costs.

Changes in the Estimates: There are no changes in the labor hours or costs in this ICR compared to the previous ICR (see rounding-off adjustment below). This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Secondly, the growth rate for the industry is very low, negative or non-existent, so there is no significant change in the overall burden.

Since there are no changes in the regulatory requirements and there is no significant industry growth, the labor hours and cost figures in the previous ICR are used in this ICR and there is no change in burden to industry.

The labor hour and cost burden in this ICR are the same as in the previous ICR; however, there is a small adjustment in the "Estimated Total Annual Cost" due to rounding up/down in the previous ICR.

Dated: February 12, 2008.

Sara Hisel-McCoy,

Director, Collection Strategies Division.
