#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

Under the provisions of the  
Magnuson-Stevens Fishery  
Conservation and Management Act (16  
U.S.C. 1801 *et seq.*), the National  
Oceanic and Atmospheric  
Administration's National Marine  
Fisheries Service (NMFS) is responsible  
for management of the nation's marine  
fisheries. In addition, NMFS must  
comply with the United States'  
obligations under the Atlantic Tunas  
Convention Act of 1975 (16 U.S.C. 971  
*et seq.*), which implements the  
International Commission for the  
Conservation of Atlantic Tunas (ICCAT)  
recommendations. NMFS collects  
information via vessel logbooks to

monitor the U.S. catch of Atlantic  
swordfish, sharks, marlins, and tunas in  
relation to the quotas, thereby ensuring  
that the United States complies with its  
domestic and international obligations.  
The information supplied through  
vessel logbooks also provides the catch  
and effort data necessary to assess the  
status of highly migratory species and to  
evaluate bycatch in each fishery.  
International stock assessments for  
tunas, swordfish, marlins, and some  
species of sharks are conducted and  
presented to the ICCAT periodically and  
provide, in part, the basis for ICCAT  
management recommendations which  
become binding on member nations.  
The domestic stock assessments for  
most species of sharks are used as the  
basis of managing these species.  
Supplementary information on fishing  
costs and earnings has been collected  
via this vessel logbook program. This  
economic information enables NMFS to  
assess the economic impacts of  
regulatory programs on small businesses  
and fishing communities, consistent  
with the National Environmental Policy  
Act (NEPA), Executive Order 12866, the  
Regulatory Flexibility Act, and other  
domestic laws.

#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

NOAA has established a program to  
reduce excess fishing capacity by paying  
fishermen to (1) surrender their fishing  
permits or (2) both surrender their  
permits and either scrap their vessels or  
restrict vessel titles to prevent fishing.

These fishing capacity reduction programs, or buybacks, can be funded by a Federal loan to the industry or by direct Federal or other funding. These buybacks are conducted pursuant to the Magnuson-Stevens Fishery Conservation and Management Act, and the Magnuson-Stevens Reauthorization Act (Pub. L. 109–479). The regulations implementing the buybacks are at 50 CFR part 600.

Depending upon the type of buyback involved, the program can entail the submission of buyback requests by industry, the submission of bids, referenda of fishery participants, and reporting of the collection of fees to repay a Federal loan. For buybacks involving State-managed fisheries, the State may need to develop the buyback plan and comply with other information requirements. The information collected by NMFS is required to request a buyback, submit supporting data for requested buybacks, to submit bids, and to conduct referenda of fishery participants.

The recordkeeping and reporting requirements at 50 CFR parts 600.1013 through 600.1017 form the basis for this collection of information on fee payment and collection. NMFS requests information from participating buyback participants. This information, upon receipt, tracks the repayment of the Federal loans that are issued as part of the buybacks, and ensures accurate management and monitoring of the loans during the repayment term.

## II. Method of Collection

Paper reports or electronic reports are required from buyback participants. Methods of submittal include mailing of paper forms, submission of forms via the Internet, and/or facsimile transmission of paper forms.

## III. Data

#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

The Magnuson-Stevens Fishery Conservation and Management Act authorizes the North Pacific Fishery Management Council to prepare and amend fishery management plans for any fishery in waters under its jurisdiction. Fishing for groundfish by U.S. vessels in the exclusive economic zone (EEZ) in waters off the coast of Alaska is managed by the National Marine Fisheries Service (NMFS) according to the Fishery Management Plan for Groundfish of the Gulf of Alaska and the Fishery Management Plan for the Groundfish Fishery of the Bering Sea and Aleutian Islands Management Area (FMPs). Regulations implementing the FMPs are found at 50 CFR part 679.

The owners of shoreside processors and stationary floating processors are required to annually submit the COAR to the State of Alaska, Department of Fish and Game (ADF&G), under Alaska Administrative Code (AAC), chapter 5 AAC 39.130. Owners of catcher/processors and motherships operating in the EEZ off Alaska are required to annually submit the COAR to ADF&G under 50 CFR part 679.5(p).

The COAR provides information on exvessel and first wholesale values for statewide fish and shellfish products. Containing information from shoreside processors, stationary floating processors, motherships, and catcher/processors, this data collection yields equivalent annual product value information for all respective processing sectors and provides a consistent time series according to which groundfish resources may be managed more efficiently.

##### II. Method of Collection

Paper reports are required from participants; these reports are transmitted by U.S. mail.
