II. Background

A. What Action is the Agency Taking?

EPA is releasing for public comment its human health and environmental fate and effects risk assessments and related documents for sulfometuron methyl and soliciting public comment on risk management ideas or proposals. Sulfometuron methyl is a non-selective sulfonylurea herbicide primarily used for weed control in forestry, and vegetative management in rights of ways, roadways, and railroads. There are no food uses for sulfometuron methyl. EPA developed the risk assessments and risk characterization for sulfometuron methyl through a modified version of its public process for making pesticide reregistration eligibility decisions. Through these programs, EPA is ensuring that pesticides meet current standards under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Federal Food, Drug, and Cosmetic Act (FFDCA), as amended by the Food Quality Protection Act of 1996 (FQPA).

Sulfometuron methyl controls a variety of broad leaf weeds and grasses by inhibiting the activity of the enzyme acetolactate synthase (ALS), which inhibits the production of amino acids required for growth. Sulfometuron methyl is formulated as a water dispersible granule (WDG) and applied using a variety of methods including helicopter, fixed-wing aircraft, ground spray (boom and backpack), and spot treatment.

EPA is providing an opportunity, through this notice, for interested parties to provide comments and input on the Agency's risk assessments for sulfometuron methyl. Such comments and input could address the availability of additional data to further refine the risk assessments, or could address the Agency's risk assessment methodologies and assumptions as applied to this specific pesticide.

Through this notice, EPA also is providing an opportunity for interested

parties to provide risk management proposals or otherwise comment on risk management for sulfometuron methyl. Risks of concern associated with the use of sulfometuron methyl are: indirect effects on freshwater fish and invertebrates, estuarine/marine fish and invertebrates, and acute and chronic exposure to aquatic and terrestrial plants. In targeting these risks of concern, the Agency solicits information on effective and practical risk reduction measures.

EPA seeks to achieve environmental justice, the fair treatment and meaningful involvement of all people, regardless of race, color, national origin, or income, in the development, implementation, and enforcement of environmental laws, regulations, and policies. To help address potential environmental justice issues, the Agency seeks information on any groups or segments of the population who, as a result of their location, cultural practices, or other factors, may have atypical, unusually high exposure to sulfometuron methyl, compared to the general population.

EPA is applying the principles of public participation to all pesticides undergoing reregistration. The Agency's Pesticide Tolerance Reassessment and Reregistration; Public Participation Process, published in the **Federal Register** on May 14, 2004 (69 FR 26819) (FRL-7357-9), explains that in conducting these programs, the Agency is tailoring its public participation process to be commensurate with the level of risk, extent of use, complexity of the issues, and degree of public concern associated with each pesticide. For sulfometuron methyl, a modified, 4-Phase process with one comment period seems appropriate in view of its limited risk and few complex issues. However, if as a result of comments received during this comment period EPA finds that additional issues warranting further discussion are raised, the Agency may lengthen the process and include a second comment period, as needed.

All comments should be submitted using the methods in **ADDRESSES**, and must be received by EPA on or before the closing date. Comments will become part of the Agency Docket for sulfometuron methyl. Comments received after the close of the comment period will be marked "late." EPA is not required to consider these late comments.

B. What is the Agency's Authority for Taking this Action?

Section 4(g)(2) of FIFRA, as amended, directs that, after submission of all data concerning a pesticide active ingredient,

"the Administrator shall determine whether pesticides containing such active ingredient are eligible for reregistration," before calling in product-specific data on individual end-use products and either reregistering products or taking other "appropriate regulatory action."
