SUPPLEMENTARY INFORMATION:

Title: Nomination Request Form; Animal Disease Training.

OMB Number: 0579-xxxx.

Type of Request: Approval of a new information collection.

Abstract: Under the Animal Health Protection Act (7 U.S.C. 8301 *et seq.*), the Animal and Plant Health Inspection Service (APHIS) of the United States Department of Agriculture is authorized, among other things, to prohibit or restrict the importation and interstate movement of animals and animal products to prevent the introduction into and dissemination within the United States of animal diseases and pests and for eradicating such diseases when feasible. In connection with this mission, the Veterinary Services (VS) program of APHIS provides vital training to State, industry, and academic personnel to prepare them to respond to an animal disease event, including disease eradication activities and sample collection.

Individuals who wish to attend animal disease-related training must submit a Nomination Request Form (VS-1-5) to VS to help the program coordinate courses and select participants. VS develops rosters with course participants' names and their contact information to notify them of future training courses and to encourage contact among participants throughout their careers. We are asking the Office of Management and Budget (OMB) to approve our use of this information collection activity for 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the

Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the information collection, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the information collection on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies, e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 1.275985663 hours per response.

Respondents: State, industry, and academic personnel.

Estimated annual number of respondents: 552.

Estimated annual number of responses per respondent: 1.010869565.

Estimated annual number of responses: 558.

Estimated total annual burden on respondents: 712 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 27th day of February 2008.

Kevin Shea,

Acting Administrator, Animal and Plant Health Inspection Service.
