BILLING CODE 4510-26-P

NATIONAL SCIENCE FOUNDATION

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: National Science Foundation.

ACTION: Notice and request for comments.

SUMMARY: Under the paperwork Reduction Act of 1995, Public Law 104-13 (44 U.S.C. 3501 *et seq.*), and as part of its continuing effort to reduce paperwork and respondent burden, the National Science Foundation (NSF) is inviting the general public or other Federal agencies to comment on this proposed continuing information collection. The National Science Foundation (NSF) will publish periodic summaries of the proposed projects.

Comments: Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Foundation, including whether the information will have practical utility; (b) the accuracy of the Foundation's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of automated collection techniques or other forms of information technology.

DATES: Written comments on this notice must be received by May 6, 2008, to be assured consideration. Comments received after that date will be considered to the extent practicable. Send comments to address below.

FOR FURTHER INFORMATION CONTACT: Ms. Suzanne H. Plimpton, Reports Clearance Officer, National Science Foundation, 4201 Wilson Boulevard, Suite 295, Arlington, Virginia 22230; telephone (703) 292-7556; or send e-mail to splimpto@nsf.gov. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 between 8 a.m. and 8

p.m., eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION:

Title of Collection: 2008 Survey of Doctorate Recipients.

OMB Approval Number: 3145-0020.

Expiration Date of Approval: February, 28, 2009.

Type of Request: Intent to seek approval to reinstate an information collection for three years.

1. Abstract

The Survey of Doctorate Recipients (SDR) has been conducted biennially since 1973. The 2008 SDR will consist of a sample of individuals under the age 76 who have earned a research doctoral degree in a science, engineering or health field from an U.S. institution. The purpose of this longitudinal panel study is to provide national estimates on the doctoral science and engineering workforce and changes in employment, education and demographic characteristics. The study is one of three components of the Scientists and Engineers Statistical Data System (SESTAT), which produces national estimates of the size and characteristics of the nation's science and engineering population.

The National Science Foundation Act of 1950, as subsequently amended, includes a statutory charge to "* * * provide a central clearinghouse for the collection, interpretation, and analysis of data on scientific and engineering resources, and to provide a source of information for policy formulation by other agencies of the Federal Government." The SDR is designed to comply with these mandates by providing information on the supply and utilization of the nation's doctoral level scientists and engineers. Collected data will be used to produce estimates of the characteristics of these individuals. They will also provide necessary input into the SESTAT data system, which produces national estimates of the size and characteristics of the country's science and engineering population.

The Foundation uses this information to prepare congressionally mandated reports such as *Women, Minorities and Persons with Disabilities in Science and Engineering and Science and Engineering Indicators*. The NSF publishes statistics from the survey in many reports, but primarily in the biennial series, *Characteristics of Doctoral Scientists and Engineers in the United States*. A public release file of collected data, designed to protect respondent confidentiality, also will be made available to researchers on CD-

ROM and on the World Wide Web. A private contractor is currently being selected to conduct this study for NSF. Data will be obtained by mail questionnaire, computer-assisted telephone interviews and web survey beginning October 2008. The survey will be collected in conformance with the Confidential Information and Statistical Efficient Act of 2002. The individual's response to the survey is voluntary. NSF will insure that all information collected will be kept strictly confidential and will be used only for statistical purposes.

2. Expected Respondents

A statistical sample of approximately 40,000 individuals with U.S. earned doctorates in science, engineering and health will be contacted in 2008. The total response rate in 2006 was 79%. NSF is also considering sampling 2,000 additional U.S. doctorates that received their degrees in the 2001-2007 academic years, who are non U.S. citizens, and indicated they planned on leaving the United States after they received their doctorate.

3. Estimate of Burden

The amount of time to complete the questionnaire may vary depending on an individual's circumstances; however, on average it will take approximately 25 minutes to complete the survey. We estimate that the total annual burden will be 16,700 hours during the collection. If the additional 2,000 respondents who had plans to leave the United States are included in the sample, that will increase the burden an additional 850 hours to a total of 17,550 hours.

Dated: March 4, 2008.

Suzanne H. Plimpton,

Reports Clearance Officer, National Science Foundation.

SUPPLEMENTARY INFORMATION: *Title of Collection:* 2008 National Survey of Recent College Graduates.

OMB Approval Number: 3145-0077.
Expiration Date of Approval: February 28, 2009.

Type of Request: Intent to seek approval to reinstate an information collection for three years.

1. Abstract

The National Survey of Recent College Graduates (NSRCG) has been conducted biennially since 1974. The 2008 NSRCG will consist of a sample of individuals who have completed bachelor's and master's degrees in science, engineering and health from U.S. institutions during the academic years 2006 and 2007. The purpose of this study is to provide national estimates on the new entrants into the science and engineering workforce and to provide estimates on the characteristics of recent bachelor's and master's graduates with science, engineering and health degrees. The

study is one of three components of the Scientists and Engineers Statistical Data System (SESTAT), which produces national estimates of the size and characteristics of the nation's science and engineering population.

The National Science Foundation Act of 1950, as subsequently amended, includes a statutory charge to " * * provide a central clearinghouse for the collection, interpretation, and analysis of data on scientific and engineering resources, and to provide a source of information for policy formulation by other agencies of the Federal Government." The NSRCG is designed to comply with these mandates by providing information on the supply and utilization of the nation's recent bachelor's and master's level scientists and engineers. Collected data will be used to produce estimates of the characteristics of these individuals. They will also provide necessary input into the SESTAT data system, which produces national estimates of the size and characteristics of the country's science and engineering population.

The Foundation uses this information to prepare congressionally-mandated reports such as *Women, Minorities and Persons with Disabilities in Science and Engineering and Science and Engineering Indicators*. NSF publishes statistics from the survey in many reports, but primarily in the biennial series, *Characteristics of Recent Science and Engineering Graduates in the United States*. A public release file of collected data, designed to protect respondent confidentiality, also is expected to be made available to researchers on CD-ROM and on the World Wide Web.

Mathematica Policy Research, Inc. will conduct the study for NSF. Data will be obtained by mail questionnaire, computer-assisted telephone interviews and web survey beginning in October 2008. The survey will be collected in conformance with the Confidential Information Protection and Statistical Efficiency Act of 2002, and the individual's response to the survey is voluntary. NSF will insure that all information collected will be kept strictly confidential and will be used only for statistical purposes.

2. Expected Respondents

A statistical sample of approximately 18,000 bachelor's and master's degree recipients in science, engineering, and health will be contacted in 2008. The total response rate in 2006 was 69%.

3. Estimate of Burden

The amount of time to complete the questionnaire may vary depending on an individual's circumstances; however, on average it will take approximately 25 minutes to complete the survey. We estimate that the total annual burden will be 7,500 hours during the 2008 survey cycle.

Dated: March 4, 2008.

Suzanne H. Plimpton,
Reports Clearance Officer, National Science Foundation.
