SUPPLEMENTARY INFORMATION:

I. Description of the Proposed System of Records

The Department of Veterans Affairs (VA) receives and responds to questions, suggestions, compliments, complaints, requests for the status of claims and other information, collectively referred to as inquiries, received from veterans, their representatives and individuals and entities doing business with VA via a Web-based communications system known as the Inquiry Routing & Information System (IRIS). This system is also used by VA call center staff to enter inquiries on behalf of veterans and others doing business with the Department.

The IRIS is accessed by clicking on the "Contact VA" link that appears on VA Internet Web sites. Thousands of messages are received each month from VA beneficiaries and other veterans, veterans' family members and/or their representatives, health care professionals, clinicians, employees and managers of small businesses, vendors, funeral directors, mortgage companies, realtors, home buyers, researchers, small business owners, veterans' service organizations, other Federal agencies, State and local government employees, teachers, and other demographic groups representing every segment of the population both at home and abroad. Messages are routed throughout VA based on type of issue and topic as selected by the inquirer and also on the physical location of the inquirer, if provided. Messages go to designated mailgroups in Veterans Benefits Administration, Veterans Health Administration, National Cemetery Administration, and other VA program offices.

In November 2002, VA purchased and implemented a heavily customized version of a Web-based, commercial contact management product for use on VA's Internet Web site at <http://www.va.gov> and for use by VA call center personnel who enter inquiries on behalf of veterans or other callers. Visitors to the VA Web site and other inquirers may ask questions or provide VA with information by completing an approved form or having the form completed for them by call center staff. All personal data are captured and maintained within a database on a secure Web server running Secure Socket Layer (SSL). The information that VA requests on the form is necessary for VA to adequately respond to the inquiries. The IRIS gives VA managers the ability to track inquiry traffic, to measure the quality and timeliness of responses, and to develop

and post Frequently Asked Questions (FAQs) based on the analysis of messages received.

The use of the IRIS by VA Web site visitors and callers to VA call centers illustrates its utility for communications with VA. VA staff will search the IRIS database by personal identifier to provide a thorough response to the inquirer. The expansion of the search capability in the IRIS database enables VA to provide better service, associate communications from a single individual and provide more thorough responses to their inquiries. The new system of records will cover anyone who chooses to submit an inquiry in person, by calling a VA call center, or by submitting an electronic message directly to VA.

Information requested to process the request may include name, address, phone number, e-mail address, and service or claim number and Social Security number if provided by the inquirer. Inquirers are not required to provide personal or contact information; however, in some instances VA may need this information in order to respond to specific inquiries. The authority to maintain these records is title 38, United States Code, section 501.

II. Routine Uses of Records Maintained in the System, Including Categories of Users and the Purposes of Such Uses

Limitation on Routine Use

Disclosures: To the extent that records contained in the system include information protected by 45 CFR Parts 160 and 164, *i.e.*, individually identifiable health information, and 38 U.S.C. 7332, *i.e.*, medical treatment information related to drug abuse, alcoholism or alcohol abuse, sickle cell anemia or infection with the human immunodeficiency virus, that information cannot be disclosed under a routine use unless there is also specific statutory authority in 38 U.S.C. 7332 and regulatory authority in 45 CFR Parts 160 and 164 permitting disclosure.

1. **Contractors:** Disclosure may be made to individuals, organizations, private or public agencies, or other entities or individuals with whom VA has a contract or agreement to perform such services as VA may deem practicable for the purposes of laws administered by VA, in order for the contractor, subcontractor, public or private agency, or other entity or individual with whom VA has an agreement or contract to perform the services of the contract or agreement. This routine use includes disclosures by the individual or entity performing the service for VA to any secondary entity or individual to perform an activity that
