

police, engineers, explosive ordnance detachments, logistics and command and control functions. Secondly, growth, realignment, and transformation could involve the addition of new support brigades or constituent units of support brigades at reasonable locations capable of supporting operations in the Pacific Theater. Support brigade stationing decisions could involve the stationing of an aviation brigade, a fires brigade, a battlefield surveillance brigade, a maneuver enhancement brigade, a sustainment brigade, an engineer brigade, a military police brigade, or a combination of these support brigades and the units that compose them. The Army is not considering the stationing of new Brigade Combat Teams (BCT) in USARPAC at this time.

Proposed alternatives to grow the Army to support operations in the Pacific Theater could involve three primary actions depending on the installation being analyzed. These actions include the construction of housing and quality of life facilities (i.e., barracks, schools, gymnasiums), the construction of new training ranges and infrastructure, and changes in the intensity and frequency of use of maneuver land and firing ranges. Evaluations will include strategic military and national security considerations for new stationing actions at locations that, if selected, are capable of supporting the National Security Strategy (2006), the QDR (2006), National Military Strategy, and the Army Campaign Plan.

Based on public scoping and the factors discussed above, the Army will refine its range of reasonable alternatives to the extent possible to accommodate both mission requirements and quality of life considerations. In reaching its decision, the Army will assess and consider public concerns. The SPEIS will compare the direct, indirect, and cumulative environmental effects that may result from stationing actions connected with initiatives to grow the Army. The primary environmental issues to be analyzed will include those identified as the result of the scoping process and installation-specific considerations. These issues may include impacts to soil, water and air quality, airspace conflicts, natural and cultural resources, land use compatibility, noise, socioeconomic, environmental justice, energy use, human health and safety considerations, and infrastructure and range/training requirements.

Scoping and Public Comment: All interested members of the public,

federally-recognized Indian Tribes, Alaska Natives, Native Hawaiian groups, federal, state, and local agencies are invited to participate in the scoping process for the preparation of this SPEIS. Comments identifying environmental issues, concerns and opportunities to be analyzed in the SPEIS will be accepted for 30 days following publication of this Notice of Intent in the **Federal Register**.

Dated: March 5, 2008.

Addison D. Davis, IV,

Deputy Assistant Secretary of the Army (Environment, Safety, and Occupational Health).

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. IC08-510-000; FERC-510]

Commission Information Collection Activities, Proposed Collection; Comment Request; Extension

March 6, 2008.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of proposed information collection and request for comments.

¹ ISO New England Inc., 122 FERC ¶ 61,057 (2008).

SUMMARY: In compliance with the requirements of section 3506(c)(2)(a) of the Paperwork Reduction Act of 1995 (Pub. L. No. 104-13), the Federal Energy Regulatory Commission (Commission) is soliciting public comment on the specific aspects of the information collection described below.

DATES: Comments on the collection of information are due May 15, 2008.

ADDRESSES: Copies of sample filings of the proposed collection of information can be obtained from the Commission's Web site (<http://www.ferc.gov/docs-filing/elibrary.asp>) or to the Federal Energy Regulatory Commission, Attn: Michael Miller, Office of the Executive Director, ED-34, 888 First Street NE., Washington, DC 20426. Comments may be filed either in paper format or electronically. Those parties filing electronically do not need to make a paper filing. For paper filing, the original and 14 copies of such comments should be submitted to the Office of the Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426 and refer to Docket No. IC08-510-000.

Documents filed electronically via the Internet must be prepared in an acceptable filing format and in compliance with the Federal Energy Regulatory Commission submission guidelines. Complete filing instructions and acceptable filing formats are available at (<http://www.ferc.gov/help/submission-guide/electronic-media.asp>). To file the document electronically, access the Commission's Web site and click on Documents & Filing, E-Filing (<http://www.ferc.gov/docs-filing/efiling.asp>), and then follow the instructions for each screen. First time users will have to establish a username and password. The Commission will send an automatic acknowledgement to the sender's e-mail address upon receipt of comments.

All comments may be viewed, printed or downloaded remotely via the Internet through FERC's homepage using the eLibrary link. For user assistance, contact ferconlinesupport@ferc.gov or toll-free at (866) 208-3676. or for TTY, contact (202) 502-8659.

FOR FURTHER INFORMATION CONTACT: Michael Miller may be reached by telephone at (202) 502-8415, by fax at (202) 273-0873, and by e-mail at michael.miller@ferc.gov.

SUPPLEMENTARY INFORMATION: The information collected under the requirements of FERC-510 "Application for Surrender of Hydropower License" (OMB No. 1902-0068) is used by the Commission to implement the statutory provisions of sections 4(e) and 6 and 13

of the Federal Power Act (FPA) 16 U.S.C. sections 797(e), 799 and 806. Section 4(e) gives the Commission authority to issue licenses for the purposes of constructing, operating and maintaining dams, water conduits, reservoirs, powerhouses, transmissions lines or other power project works necessary or convenient for developing and improving navigation, transmissions and utilization of power over which Congress has jurisdiction. Section 6 gives the Commission the authority to prescribe the conditions of licenses including the revocation or surrender of the license. Section 13 defines the Commission's authority to delegate time periods for when a license must be terminated if project

construction has not begun. Surrender of a license may be desired by a licensee when a licensed project is retired or not constructed or natural catastrophes have damaged or destroyed the project facilities. The information collected under the designation FERC-510 is in the form of a written application for surrender of a hydropower license. The information is used by Commission staff to determine the broad impact of such surrender. The Commission will issue a notice soliciting comments from the public and other agencies and conduct a careful review of the prepared application before issuing an order for Surrender of a License. The order is the result of an analysis of the information produced, i.e., economic, environmental

concerns, etc., which are examined to determine if the application for surrender is warranted. The order implements the existing regulations and is inclusive for surrender of all types of hydropower licenses issued by FERC and its predecessor, the Federal Power Commission. The Commission implements these mandatory filing requirements in the Code of Federal Regulations (CFR) under 18 CRF 6.1-6.4.

Action: The Commission is requesting a three-year extension of the current expiration date, with no changes to the existing collection of data.

Burden Statement: Public reporting burden for this collection is estimated as:

Number of respondents annually	Number of responses per respondent	Average burden hours per response	Total annual burden hours
(1)	(2)	(3)	(1)×(2)×(3)
8	1	10	80

Estimated cost burden to respondents is \$4,861.00. (80 hours/2080 hours per year times \$126,384 per year average per employee = \$4,861.00). The cost per respondent is \$608.00.

The reporting burden includes the total time, effort, or financial resources expended to generate, maintain, retain, disclose, or provide the information including: (1) Reviewing instructions; (2) developing, acquiring, installing, and utilizing technology and systems for the purposes of collecting, validating, verifying, processing, maintaining, disclosing and providing information; (3) adjusting the existing ways to comply with any previously applicable instructions and requirements; (4) training personnel to respond to a collection of information; (5) searching data sources; (6) completing and reviewing the collection of information; and (7) transmitting, or otherwise disclosing the information.

The estimate of cost for respondents is based upon salaries for professional and clerical support, as well as direct and indirect overhead costs. Direct costs include all costs directly attributable to providing this information, such as administrative costs and the cost for information technology. Indirect or overhead costs are costs incurred by an organization in support of its mission. These costs apply to activities which benefit the whole organization rather than any one particular function or activity.

Comments are invited on: (1) Whether the proposed collection of information is necessary for the proper performance

of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology e.g., permitting electronic submission of responses.

Kimberly D. Bose,
Secretary.
