Animal Welfare; Climatic and Environmental Conditions for Transportation of Warmblooded Animals Other Than Marine Mammals

ACTION: Proposed rule; reopening of comment period.

SUMMARY: We are reopening the comment period for our proposed rule that would remove the current ambient temperature requirements in the Animal Welfare Act regulations for various stages in the transportation of live animals other than marine mammals. This action will allow interested persons additional time to prepare and submit comments.

DATES: We will consider all comments that we receive on or before April 17, 2008.

ADDRESSES: You may submit comments by either of the following methods:

Airworthiness Directives; Dassault Model Falcon 2000EX and 900EX Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for the products listed above. This proposed AD results from mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as:

On early FALCON airplanes featuring the EASy cockpit, a new oxygen controller has been installed. An internal review has determined that the passenger oxygen mask boxes do not fit this new controller. In OVERRIDE mode, that is to say, when the internal pressure reducer is by-passed, oxygen (O₂) flow is nominal, while in NORMAL mode O₂ flow is reduced by half compared to what it should be.

Consequently, in NORMAL mode the minimum mass flow of supplemental O₂ for each passenger, as required by Certification Specifications, is no longer met. This could lead to passenger incommmodation due to insufficient body oxygenation.

The unsafe condition is incorrectly fitted passenger oxygen mask boxes for the new controllers, which could result in incapacitation of passengers due to insufficient oxygen in the event of rapid depressurization of the airplane when the controller is in NORMAL mode. The proposed AD would require actions that are intended to address the unsafe condition described in the MCAI.

DATES: We must receive comments on this proposed AD by April 17, 2008.
