

communications protocol that is supported by the stakeholders.

The purpose of this notice is to invite any additional comments on Alaska Power & Telephone Company's request to use the alternative procedures, pursuant to section 4.34(i) of the Commission's regulations. Additional notices seeking comments on the specific project proposal, interventions and protests, and recommended terms and conditions will be issued at a later date. Alaska Power & Telephone Company will complete and file a preliminary Environmental Assessment, in lieu of Exhibit E of the license application. This differs from the traditional process, in which an applicant consults with agencies, Indian tribes, NGOs, and other parties during preparation of the license application and before filing the application, but the Commission staff performs the environmental review after the application is filed. The alternative procedures are intended to simplify and expedite the licensing process by combining the pre-filing consultation and environmental review processes into a single process, to facilitate greater participation, and to improve communication and cooperation among the participants.

Alaska Power & Telephone Company has met with federal and state resources agencies regarding the proposed Soule River Hydroelectric Project. Alaska Power & Telephone Company intends to file 6-month progress reports during the alternative procedures process that leads to the filing of a license application by June 30, 2009.

Secretary.
