

**FOR FURTHER INFORMATION CONTACT:** For information on the Emergency Management Response System, contact Dr. Randall Crom, Senior Staff Veterinarian, National Center for Animal Health Emergency Management, VS, APHIS, 4700 River Road, Unit 41, Riverdale, MD 20737; (301) 734-8073. For copies of more detailed information on the information collection, contact Mrs. Celeste Sickles, APHIS' Information Collection Coordinator, at (301) 734-7477.

**SUPPLEMENTARY INFORMATION:**

*Title:* Emergency Management Response System.

*OMB Number:* 0579-0071.

*Type of Request:* Revision and extension of approval of an information collection.

*Abstract:* The Animal and Plant Health Inspection Service (APHIS), among other things, administers regulations intended to prevent foreign diseases of livestock or poultry from being introduced into the United States, conducts surveillance for the early detection of such foreign animal diseases, and conducts eradication programs if such foreign diseases are detected.

Through our automated Emergency Management Response System (EMRS), APHIS helps manage and investigate potential incidents of foreign animal diseases in the United States.

When a potential foreign animal disease incident is reported, APHIS dispatches a foreign animal disease veterinary diagnostician to the site to conduct an investigation. The diagnostician obtains vital epidemiologic data by conducting field investigations, including sample collection, and by interviewing the owner or manager of the premises being investigated. These important data, submitted electronically by the diagnostician into EMRS, include such items as the number of sick or dead animals on the premises, the results of necropsy examinations, vaccination information on the animals in the flock or herd, biosecurity practices at the site, whether any animals were recently moved out of the herd or flock, whether any new animals were recently introduced into the herd or flock, and detailed geographic data concerning premises location.

The previous title of this collection was "Foreign Animal Disease/Emerging Disease Investigation (FAD/EDI) Database." After development and implementation of an automated system to collect animal disease related data, the collection title was changed to "Emergency Management Response

System." The Web-based system allows epidemiological and diagnostic data to be documented and transmitted more efficiently. VS form 12-27, which was used by diagnosticians to record data prior to EMRS implementation, is now obsolete.

We are asking the Office of Management (OMB) to approve our use of these information collection activities for 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

*Estimate of burden:* The public reporting burden for this collection of information is estimated to average 1 hour per response.

*Respondents:* Owners/managers of premises.

*Estimated annual number of respondents:* 660.

*Estimated annual number of responses per respondent:* 4.

*Estimated annual number of responses:* 2,640.

*Estimated total annual burden on respondents:* 2,640 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 7th day of April 2008.

**Kevin Shea,**

*Acting Administrator, Animal and Plant Health Inspection Service.*

**BILLING CODE 3410-34-P**

**DEPARTMENT OF AGRICULTURE**

**Animal and Plant Health Inspection Service**

[Docket No. APHIS-2008-0020]

**Notice of Request for Extension of Approval of an Information Collection; Importation of Restricted and Controlled Animal and Poultry Products and Byproducts, Organisms, and Vectors Into the United States**

**AGENCY:** Animal and Plant Health Inspection Service, USDA.

**ACTION:** Extension of approval of an information collection; comment request.

**SUMMARY:** In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service's intention to request an extension of approval of an information collection associated with the importation into the United States of restricted and controlled animal and poultry products and byproducts, organisms, and vectors.

**DATES:** We will consider all comments that we receive on or before June 10, 2008.

**ADDRESSES:** You may submit comments by either of the following methods:

- Federal eRulemaking Portal: Go to <http://www.regulations.gov/fdmspublic/component/>

*main?main=DocketDetail&d=APHIS-2008-0020* to submit or view comments and to view supporting and related materials available electronically.

- Postal Mail/Commercial Delivery: Please send two copies of your comment to Docket No. APHIS-2008-0020, Regulatory Analysis and Development, PPD, APHIS, Station 3A-03.8, 4700 River Road Unit 118, Riverdale, MD 20737-1238. Please state that your comment refers to Docket No. APHIS-2008-0020.

*Reading Room:* You may read any comments that we receive on this docket in our reading room. The reading room is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue, SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 690-2817 before coming.

*Other Information:* Additional information about APHIS and its programs is available on the Internet at <http://www.aphis.usda.gov>.

**FOR FURTHER INFORMATION CONTACT:** For information on the importation into the

United States of restricted and controlled animal and poultry products and byproducts, organisms, and vectors, contact Dr. Tracye R. Butler, Assistant Director, Technical Trade Services Team, National Center for Import and Export, VS, APHIS, 4700 River Road Unit 40, Riverdale, MD 20737; (301) 734-3277. For copies of more detailed information on the information collection, contact Mrs. Celeste Sickles, APHIS\* Information Collection Coordinator, at (301) 734-7477.

**SUPPLEMENTARY INFORMATION:**

*Title:* Importation of Restricted and Controlled Animal and Poultry Products and Byproducts, Organisms, and Vectors into the United States.

*OMB Number:* 0579-0015.

*Type of Request:* Extension of approval of an information collection.

*Abstract:* The Animal and Plant Health Inspection Service (APHIS) of the United States Department of Agriculture (USDA) regulates the importation of certain animal and poultry products and byproducts, organisms, and vectors under 9 CFR parts 94, 95, 96, and 122 to prevent the introduction and spread of livestock and poultry diseases into the United States.

To accomplish this, we must collect information from a variety of individuals, both within and outside the United States, who are involved in handling, transporting, and importing these items. Collecting this information is critical to our mission of ensuring that these imported items do not present a disease risk to the livestock and poultry populations of the United States.

We use a number of forms, documents, and other activities, including those described below.

*VS Form 16-3 (Application for Permit to Import Controlled Materials/Import or Transport Organisms or Vectors).* This is the application and agreement form used by individuals seeking a permit.

*VS Form 16-25 (Application for Approval or Report of Inspection of Establishments Handling Restricted Animal Byproducts or Controlled Materials).* This is a dual purpose form. It is an application for U.S. establishments requesting approval to handle restricted imported animal byproducts and controlled materials. It also serves as a report of inspections of establishments to ensure that restricted and controlled imports are being handled in compliance with our requirements.

*VS Form 16-26 (Agreement for Handling Restricted Imports of Animal Byproducts and Controlled Materials).* This is a form signed by an operator of

a U.S. establishment wishing to handle restricted or controlled materials in which the operator agrees to comply with all requirements for handling the restricted and controlled materials.

*Certificates.* Certain animal and poultry products must have a certificate from the national government of the exporting country to be eligible for importation into the United States. These certificates are required to verify that the animal or poultry products meet the sanitary requirements of our regulations (e.g., originated from disease-free animals and from animals native to the country of origin, or were prepared in a certain manner in an approved establishment).

The certificate, signed by a full-time salaried veterinary official of the country of origin, or other authorized person, provides us with information that enables us to determine whether an article meets our requirements for importation.

*Seals.* Certain animal or poultry products and byproducts must be shipped in sealed containers or holds to ensure that the integrity of the shipment is not violated. The seals must be numbered, the numbers of the seals must be recorded on the government certificate that accompanies the shipment, and the seals must not have been tampered with. Federal inspectors at ports of entry inspect the seals and verify that the seals are intact and that the numbers match those on the certificates.

*Compliance agreement, recordkeeping requirements.* Certain animal or poultry products and byproducts are required to be processed in a certain manner in an establishment in a foreign country before being exported to the United States. We require an official of the processing plant to sign a written agreement prepared by APHIS. By signing this agreement, this official certifies that the animal products being exported to the United States have been processed in a manner approved by APHIS, and that adequate records of these exports are being maintained.

*Marking requirements.* Before certain animal products may enter the United States, they must be marked, with an ink stamp or brand, to indicate that the products have originated from an approved meat processing establishment and have been inspected by appropriate veterinary authorities. The mark is applied to the meat product by processing plant personnel.

*Foreign meat inspection certificate for importation of fresh meat from regions free of foot-and-mouth disease and rinderpest, but subject to certain restrictions due to their proximity to, or*

*trading relationships with, regions where foot-and-mouth disease or rinderpest exists.* This certificate, completed by a veterinary official of the exporting region, provides specific information regarding the establishment where the animals were slaughtered, the origin of the animals, and the processing and handling of the meat or other animal products.

*Certification of a national government for importation of pork or pork products from a swine vesicular disease-free region.* This is a statement, completed by a government official of an exporting region, certifying that the U.S.-destined pork or pork product originated in a region that is free from swine vesicular disease.

*Certification of a national government for importation of hams.* When hams are imported into the United States from regions where swine diseases of concern (e.g., classical swine fever, swine vesicular disease, and foot-and-mouth disease) exist, APHIS requires certain disease risk mitigation measures. National governments in those regions must certify that APHIS mitigation measures, such as curing and/or cooking, have been met.

*Cleaning and disinfecting methods.* This is a letter from veterinary officials of an exporting region stating that appropriate cleaning and disinfecting methods have been applied to trucks, railroad cars, or other means of conveyance used to transport certain animal products destined for the United States.

We are asking the Office of Management and Budget (OMB) to approve out use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning this information collection. These comments will help us:

(1) Evaluate whether the information collection is necessary for the proper performance of our agency's functions, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the information collection, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection

technologies, e.g., permitting electronic submission of responses.

*Estimate of burden:* The public reporting burden for this collection of information is estimated to average 0.880251215 hours per response.

*Respondents:* Importers, exporters, shippers, foreign animal health authorities, owner/operators of establishments (domestic and foreign) who handle restricted and controlled materials.

*Estimated annual number of respondents:* 10,367.

*Estimated annual number of responses per respondent:* 2.518857914.

*Estimated annual number of responses:* 26,113.

*Estimated total annual burden on respondents:* 22,986 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.) All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 7th day of April 2008.

## DEPARTMENT OF AGRICULTURE

### Forest Service

#### **Boundary Establishment for Wildcat National Wild and Scenic River, White Mountain National Forest, Carroll County, New Hampshire State**

**AGENCY:** Forest Service, USDA.

**ACTION:** Notice of availability.

**SUMMARY:** In accordance with Section 3(b) of the Wild and Scenic Rivers Act, the USDA Forest Service, Washington Office, is transmitting the final boundary of the Wildcat National Wild and Scenic River to Congress. The Wild and Scenic Rivers Act requires that each federally administered river in the National System have a legally established boundary.

**FOR FURTHER INFORMATION CONTACT:** The Wildcat Wild and Scenic River boundary is available for review at the following offices: USDA Forest Service, Wilderness & Wild and Scenic Rivers, 1400 Independence Avenue, SW., Washington, DC 20024; USDA Forest Service Eastern Region, 626 East Wisconsin Avenue, Milwaukee, Wisconsin, 53202; and, White Mountain

National Forest, 719 North Main Street, Laconia, New Hampshire 03246. A detailed legal description is available upon request.

Additional information may be obtained by contacting Holly Jewkes, White Mountain National Forest, 33 Kancamagus Highway, Conway, New Hampshire, (603)447-5448, or via e-mail at [hjewkes@fs.fed.us](mailto:hjewkes@fs.fed.us).

**SUPPLEMENTARY INFORMATION:** The Wild and Scenic Rivers Act, as amended, (Pub. L. 100-554 of October 1988) designated the Wildcat River, New Hampshire, as a National Wild and Scenic River, to be administered by the Secretary of Agriculture. As specified by law, the boundary will not be effective until ninety days after Congress receives the transmittal.

Dated: April 3, 2008.

**Thomas G. Wagner,**

*Forest Supervisor, White Mountain National Forest.*

## DEPARTMENT OF AGRICULTURE

### Forest Service

#### **Bend/Ft. Rock Ranger District; Deschutes National Forest; Oregon; EXF Thinning, Fuels Reduction, and Research Project EIS**

**AGENCY:** Forest Service, USDA.

**ACTION:** Notice of intent to prepare an environmental impact statement.

**SUMMARY:** The USDA, Forest Service, will prepare an environmental impact statement (EIS) on a proposed action to address forest health and hazardous fuels concerns as well as facilitating research within the 3,535-acre planning area known as the Lookout Mountain Unit of the Pringle Falls Experimental Forest. The planning area is located about 30 miles southwest of Bend, Oregon; it is located in Township 20 South, Range 9 East, and Township 21 South, Range 9 East. The alternatives will include the proposed action, no action, and additional alternatives that respond to issues generated through the scoping process. The agency will give notice of the full environmental analysis and decision making process so interested and affected people may participate and contribute to the final decision.

**DATES:** Comments concerning the scope of the analysis must be received by 30 days following the date that this notice appears in the **Federal Register**.

**ADDRESSES:** Send written comments to Phil Cruz, District Ranger, Bend/Ft.

Rock Ranger District, 1230 NE 3rd St., Suite A-262, Bend, OR 97701.

**FOR FURTHER INFORMATION CONTACT:** Beth Peer, Environmental Coordinator, Bend/Ft. Rock Ranger District, 1230 NE 3 St., Suite A-262, Bend, Oregon, 97701, phone (541) 383-4769. E-mail [bpeer@fs.fed.us](mailto:bpeer@fs.fed.us).

*Responsible Official.* The responsible official will be John Allen, Forest Supervisor, Deschutes National Forest, P.O. Box 1645 Hwy 20 East, Bend, OR 97701.

**SUPPLEMENTARY INFORMATION: Purpose and Need.** Forest and scientific studies being conducted in the experimental forest are threatened by wildfire and forest health problems. This important site could be lost if stand densities are not reduced.

The proposed action is needed to reduce stand density to lower susceptibility to catastrophic loss to insects, disease, or fire, as well as to protect the long-term studies and future research opportunities represented by the residual stand and create new stand structures as a requirement for the new studies. Treatment is needed to:

- Reduce stand density and ground fuels in a buffer surrounding the Levels-of-Growing-Stock Study and surrounding the Ponderosa Pine-Grand Fir Spacing Study to prevent loss from insects and wildfire.

- Reduce stand density and ground fuels in stands belonging to ponderosa pine and mixed conifer plant associations dominated by ponderosa pine to maintain high growth rates and reduce susceptibility to insect infestation.

- Reduce stand density and ground fuels in mixed conifer stands that include mountain hemlock to reduce the risk of wildfire moving downslope into ponderosa pine stands.

- Provide operational scale research opportunities through a series of thinning and fuel reduction treatments applied across the landscape that facilitate studies of the interaction of climate change and vegetation dynamics, fire ecology of giant chinquapin, processes for converting even-aged stands to uneven-aged stands, and the effect of stand manipulation on wind patterns and wind residual tree blowdown.

- Protect and enhance future research opportunities.

The proposed activities provide a platform for a suite of new studies that address the Pacific Northwest (PNW) Research Station's goals for climate change and vegetation dynamics research. Scientists at the PNW Research Station have identified
